These are expenditures resulting in the acquisition of or addition to the government’s general fixed assets.

Enterprise Funds. Those funds used to account for operations (a) that are financed and operated in a manner similar to private business enterprise - where the intent of the governing body is that the costs (expenses, including depreciation) of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges; or (b) where the governing body has decided that periodic determination of revenues earned, expenses incurred, and/or net income is appropriate for capital maintenance, public policy, management control, accountability and other purposes.

Fixed Assets. Tangible assets of a durable nature employed in the operating activities of the unit and that are relatively permanent and are needed for the production or sale of goods or services are termed property, plant and equipment, or fixed assets. This broad group is usually separated into classes according to the physical characteristics of the items (e.g. land, buildings, improvements other than buildings, machinery and equipment, furniture and fixtures).
Historical Cost. The case equivalent price exchanged for goods or services at the date of acquisition. Land, buildings, equipment, and most inventories are common examples of items recognized under the historical cost attribute.

(B) All water collected for regular users shall be billed monthly and shall be due and payable on the first day of the month following the date of billing.

(C) All bills for water service not paid within 15 days from the due date shall be deemed delinquent and subject to a collection charge of 10% on water on the first $3 and 3% on all over $3. If the sewage charge is not paid by the penalty date, a 10% penalty will be added.

[Ord. 688, passed 8-23-61; Ord. G-82-83, passed 10-12-82; Ord. G-84-26, passed 12-11-84]

§50.16 BILLING PROCEDURE FOR TEMPORARY USERS

(A) In case of temporary users, the Waterworks Superintendent is authorized to demand payment in advance for the amount of water estimated to be required by the temporary users, in case the temporary use will be for a period of less than one week.

(B) Where temporary use will be required for a period in excess of one week, the Waterworks Superintendent is authorized to require a deposit equal to the amount of water to be used the first week of the temporary use, and thereafter to require a deposit in advance from week to week.

(C) Where water is furnished under a special contract, the Waterworks Superintendent shall collect the charges in accordance with the provisions of the contract.

[Ord. 688, passed 8-23-61; Ord. G-82-23, passed 10-12-82]

§50.17 DISCONTINUANCE OF SERVICE

(A) In the event service charges are not paid before the close of the second succeeding calendar month following the date of billing, notice shall be issued to the user in default that service shall be discontinued. The notice shall provide that the user may have the opportunity to dispute the appropriateness of the disconnection by requesting a hearing before the Department of the Board of Works by sending a written notice within seven (7) days of the date of the disconnection notice to the City of New Haven Utility Department. If a written dispute is
received from the user, it shall be placed on the agenda and heard at the next scheduled Board of Works meeting and the issue shall be decided by a majority of the Board of Works.

(B) For service to be reinstated, payments on shut-off notices must be paid at the utility office, and cannot be paid at any of the payment centers in the community. All payment centers should post a sign stating they will not be responsible for late payment charges or shut-offs if a bill is paid at that location.

(C) If disconnection for nonpayment occurs, the unpaid previous balance plus a $10 reconnection fee must be paid prior to restoration of service.

(D) A utility meter must be read at a minimum of once every six months by an authorized utility representative. In addition to discontinuance of service for the customer's failure to provide the utility access for regular meter readings, and after a period of six months without a read, the utility will require the customer to install a remote reading device to insure future reads. The customer shall pay the utility the cost of $15 for installation. The failure of the customer to provide the utility access for such installation shall be grounds for discontinuance of service. Arrangements with the utility for installation of the device shall be made within ten days after notification of such required installation.

(E) The City Auditor/Utilities Office Manager is authorized and directed to cause duly qualified representatives of the Utility Department, or other employee in charge of the operation, to shut off and reinstate water service in accordance with the provisions of this section.

Where only one stopcock is used, the owner of the service shall pay the water rate for the parties who are thus supplied, and on the failure of anyone to pay the water rates when due or to comply with the rules and regulations of the waterworks system, the supply of water will be withheld without any liability on the part of the City to any of the parties.

(B) Consumers shall not turn the water on or off at the curbcock. All service pipes must have a stopcock and wastecock placed between the curb and the premises, to shut the water off and drain pipes to keep them from freezing and to make repairs.

(C) Any changes necessary to be made in the location of a curbcock will be made at the expense of the property owner. Notice will be given to the agent or owner, and if the work is not done within a reasonable length of time, the City will do the work and the expense will be
charged to the owner; and if not paid on or before the next following payment of water rent, the water service will be shut off until payment is made.

(D) In cases of new installations, no service pipes will be allowed to run across lots, from one lot to another, but each lot shall be served by a service pipe taken direct from the main serving the premises.

(E) In case of new installation, no two separate premises shall be supplied from one service pipe. A separate service shall be installed by each separate premises; however, apartment houses, duplex flats, and double houses are excepted.

(F) In all cases where service is connected direct to boilers or other hot water fixtures that are likely to cause a backwater pressure, a check valve must be installed on the service pipe to prevent injury to the meter, and all damages caused to meters by back pressure shall be paid for by the consumer where the damage occurs.

[Ord. 688, passed 8-23-61]

(C) Where meters are set in basements or cellars, the consumer will be required to keep the surroundings of the meter clean and with ease of access and protect the same from freezing or injury.

(D) “Premises” shall include all buildings or divisions under one common roof, owned by one party, and all dwellings or buildings owned by one party and supplied through one service pipe from the main; and one or more meters may be placed on service pipes leading into the premises, and all charges will be made against each rental unit or customer served.

(C)  Biochemical Oxygen Demand (BOD). The quantity of dissolved oxygen, in milligrams per liter, required during the stabilization of the decomposable organic matter by aerobic biochemical action of sewage, sewage effluent, polluted waters, or industrial wastes under standard laboratory procedures for five days at 20 degrees centigrade. The laboratory determinations shall be made in accordance with procedures set forth in "Standard Methods" (see paragraph (MM) below).

(D)  Building (or House) Drain. That part of the lowest horizontal piping of a building drainage system that receives the discharge from soil, waste, or other drainage pipes inside walls of the building and conveys it to a point outside the foundation wall of the building.

(E)  Building (or House) Drain Connection. The point where the building (or House) sewer is connected to the building drain at a location approximately three (3) feet outside the foundation wall of the building.

(F)  Building (or House) Sewer. The pipe which is connected to the building (or House) drain at a point three (3) feet outside the foundation wall of the building and which conveys the building's discharge from that point to the public sewer or the place of disposal.

(G)  Building (or House) Sewer Connection. The point where the building sewer is connected to the public sewer. This connection to the public sewer may be accomplished as follows:

1)  Where a tap-in connection is employed, the point of connection shall be where the end of the building sewer meets the inside face of the sewage system and the tapping "saddle and/or joint" shall be considered part of the building sewer.
(2) Where fittings (T's or Y's) are employed, the connection shall be where the end of the first pipe meets the end of the fitting and the said T or Y fitting shall be considered a part of the building sewer.

(H) Bulk Waste. Any containerized solid, liquid or gaseous substance discarded or to be discarded as worthless, defective, or of no use to the person discarding said substance.

§51.02 RULES AND REGULATIONS; BOARD OF WORKS AUTHORITY

The Board of Public Works of the City shall, in accordance with the Statutes of the State of Indiana, and subject to the provisions and requirements of this Chapter, make and enforce appropriate rules and regulations for the safe, economical and efficient management and operation of the City's Sewerage System, for the construction and use of sewers, building sewers, appurtenances, and connections to the sewerage system; for the regulations, collection and refunding of rates and charges for sewerage service; and for the implementation of the provisions of this Chapter.

[Ord. G-93-5, passed 6-8-93]

§51.03 REQUIREMENTS FOR CONNECTION TO PUBLIC SEWERS

(A) No owner or occupant of any real property shall tap or drain either directly or indirectly into any public sewer until a sewer tap permit has been obtained from the City and until the owner has satisfied the obligation to pay all assessments, reimbursements and pro rata shares of sewers extension costs laid against that property for public sewers which serve it. A sewer tap permit given in error shall not operate to nullify any such obligation that has been duly recorded nor stop the City from charging and collecting such costs at any subsequent time.

(B) Notwithstanding the foregoing, the Utility may, in accordance with policies and procedures adopted by the Board of Public Works from time to time, permit an owner or occupant to tap or drain into a public sewer and to defer, in whole or in part, payment of the obligation, upon the execution and delivery to the Utility of a note, mortgage, lien document or other evidence or obligation acceptable to the Utility.

(C) All such deferred obligations shall be considered for the purposes of Indiana Code Sections 36-9-23-31 through 36-9-23-34 to be fees assessed against real property.

(D) Installments of deferred obligations, including any finance charges or interest chargeable thereon, shall be deemed to be charges for sewerage service for the purposes of this Chapter.

(E) Sewer tap permits shall be obtained from the City's Utility Office and shall be issued only to licensed sewer tap contractors, who shall pay to the City a fee as determined, from time to time, by the Board of Works. Not later than forty-eight (48) hours after making each sewer tap and building of the sewer installation, the tap contractor or property owner shall notify the Utility Office of such connections so that an inspection may be made by the Utility prior to backfilling the said sewer installation.

(Revised 05/03/2004)
(F) No person shall connect any roof downspout, exterior foundation drain, or other source of surface runoff or groundwater to a building sewer or building drain which is connected either directly or indirectly to a sanitary sewer of the City.

(G) The Board of Public Works shall have authority to require an owner of real property to disconnect any downspouts, yard drains, or other drains which carry the runoff of natural precipitation from the building sewer which drains into a sanitary sewer. Property owners shall have a period of ninety (90) days to comply with this requirement. Notwithstanding the foregoing, the City of New Haven Director of Engineering’s Office may, in accordance with policies and procedures adopted by the Board of Works, extend the time for compliance with this subsection for a period of up to one hundred eighty (180) days upon written application from a property owner filed prior to the expiration of the ninety (90) day period.

(H) A new connection may be made to a City sewer or sewers connected to the City system only after there has been adequate assurance to the City that the downstream facilities of the sewage works have adequate capacity to transmit and treat the new waste loadings.

(I) At such time as the City installs a sanitary sewer or separates existing combination sewers into a sanitary sewer and a storm sewer, the following shall apply:

1. When separate sewer connections become available to a property, the property owner shall be required to make separate connections to the sanitary sewer for sanitary flows and to the storm sewer for inflow-clear water flows. Property owners shall have a period of ninety (90) days to comply with this requirement.

2. If any new building construction takes place in an existing combined sewer area, a separate connection to the sanitary sewer for the conveyance of sanitary sewage and to the storm water connection for the conveyance of storm surface and groundwater drainage shall be constructed at the expense of the property owner. Such connection shall be joined as close to the property line adjacent to the sewer as is practical. Notwithstanding the foregoing, the City of New Haven Director of Engineering’s Office may, in accordance with policies and procedures adopted by the Board of Works, extend the time for compliance with this subsection for a period of up to one hundred eighty (180) days upon written application from a property owner filed prior to the expiration of the ninety (90) day period.

(J) All work of any nature (including, without limitation, connections, extensions, alterations, or replacements) performed on any combination or sanitary sewer shall conform to the City of New Haven’s Standards & Specifications as adopted by the City of New Haven Board of Public Works and Safety unless otherwise expressly regulated by this Chapter.

(K) The requirement for a separate storm sewer connection will be waived where the property owner can establish to the satisfaction of the City Director of Engineering’s Office that there is no contribution of storm surface or groundwater to the sanitary sewer system by the

(Revised 05/03/2004)
property or any activity thereon. The decision of the Director of Engineering may be appealed by petition to the Board of Works, submitted within thirty (30) days.

(L) No person shall make use of a sewer tap or backfill or otherwise conceal a sewer installation unless and until the same has been inspected and approved by the Utility. In addition to all other remedies, the Utility may cause the said installation of sewer tap to be excavated and exposed, may terminate the connection, and may require the owner or occupant to pay or reimburse the Utility for its costs and expenses in such excavation, exposure, termination, reconnection and restoration. Such costs and expenses shall be considered as charges for sewerage treatment services and may be collected in accordance with the provisions of Indiana Code 36-9-23-31 through 36-9-23-34 and this Chapter.

[Ord. G-01-8, passed 7-10-01]

Such manholes shall be constructed in accordance with the standards and specifications from time to time added by the Board of Works. The Board may also require the person to install and maintain in any such manhole, at said person's expense, an approved volume-measuring device. Plans and/or shop drawings for the installation of control manholes and related equipment must be approved by the City Engineer before any construction is begun.

Analyses made by the Control Authority at the request of the user shall be charged to the user according to the Utility's standard work order billing procedure. All such analyses shall be binding in determining the strength-of-waste surcharge and other matters dependent upon the character and concentration of wastes.

[Ord. G-93-5, passed 6-8-93]

§51.37 USE OF REPRESENTATIVE ANALYSIS

Until an adequate analysis of a representative sample of user's wastes has been obtained, the Control Authority may, for the purpose of this Chapter, make a determination of the character and concentration of his wastes by using data based on analyses of similar processes or data for his type of business that are available from the United States Environmental Protection Agency or from industry-recognized authoritative sources. This method, if selected by the Control Authority, shall continue at the Control Authority's pleasure or until an adequate analysis has been made.

SERVICE CHARGES BASED ON WATER USAGE

§51.41  WATER OBTAINED FROM THE CITY’S WATER UTILITY

The charges made for sewerage service rendered to each lot, parcel of real estate or building having any connection with the City's sewerage system or otherwise discharging sewage into the system, either directly or indirectly, shall be based upon the quantity of water presumed to enter the public sewers after being used in or on the property, as the quantity is measured by the water meter or meters there in use by the City's Water Utility, except as herein otherwise provided.

[Ord. G-93-5, passed 6-8-93]

Where the property obtains any part or all of the water used from sources other than the City's Water Utility, the owner or the tenant may be required by the City to install and maintain at his own expense a meter or meters acceptable to the City for the quantity of water obtained from these other sources.

[Ord. G-93-5, passed 6-8-93]

Where a significant portion of the metered water does not and cannot enter the sewerage system, either directly or indirectly, the person having charge of the property may request permission from the City to install at his own expense either an approved meter or meters to determine the quantity of water that cannot enter the sewerage system or an approved sewage-measuring device or devices to determine the volume of sewage that actually enters the sewerage system, when appropriate. In any case, the service charge shall be based on the quantity of water that can or actually does enter the public sewers but in no case shall it be less than the minimum charge for the class of users served.

[Ord. G-93-5, passed 6-8-93]

§51.44  METERING OF SEWAGE

The City may require a person to install and maintain at his own expense an approved device to measure directly the volumes of wastes discharged to the sewerage system if these volumes cannot otherwise be determined from the metered-water consumption records. The City shall inspect and approve such installation and no such service, once installed, shall be removed without the City's approval.

(a) Purpose. It is the purpose of this Chapter to regulate sexually oriented businesses in order to promote the health, safety, and general welfare of the citizens of the City, and to establish reasonable and uniform regulations to prevent the deleterious secondary effects of sexually oriented businesses within the City. The provisions of this Chapter have neither the purpose nor effect of imposing a limitation or restriction on the content or reasonable access to any communicative materials, including sexually oriented materials. Similarly, it is neither the intent nor effect of this Chapter to restrict or deny access by adults to sexually oriented materials protected by the First Amendment, or to deny access by the distributors and exhibitors of sexually oriented entertainment to their intended market. Neither is it the intent nor effect of this Chapter to condone or legitimize the distribution of obscene material.

the Common Council finds:

(1) Sexually oriented businesses, as a category of commercial uses, are associated with a wide variety of adverse secondary effects including, but not limited to, personal and property crimes, prostitution, potential spread of disease, lewdness, public indecency, obscenity, illicit drug use and drug trafficking, negative impacts on surrounding properties, urban blight, litter, and sexual assault and exploitation.

(2) Each of the foregoing negative secondary effects constitutes a harm which the City has a substantial government interest in preventing and/or abating. This substantial government interest in preventing secondary effects, which is the City’s rationale for this Chapter, exists independent of any comparative analysis between sexually oriented and non-sexually oriented businesses. Additionally, the City’s interest in regulating sexually oriented businesses extends to preventing future secondary effects of either current or future sexually oriented businesses that may locate in the City. The City finds that the cases and documentation relied on in this Chapter are reasonably believed to be relevant to said secondary effects.

The City hereby adopts and incorporates herein its stated findings and legislative record related to the adverse secondary effects of sexually oriented businesses, including the judicial opinions and reports related to such secondary effects.

The Temporary License shall expire upon the final decision of the City to deny or grant an annual license. Within twenty (20) days of the filing of a completed sexually oriented business license application, the Chief of Police shall either issue a license to the applicant or issue a written notice of intent to deny a license to the applicant. The Chief of Police shall issue a license unless:

The Temporary License shall expire upon the final decision of the City to deny or grant an annual license. Within twenty (20) days of the filing of a completed sexually oriented business employee license application, the Chief of Police shall either issue a license to the applicant or issue a written notice of intent to deny a license to the applicant. The sexually oriented business license shall be posted in a conspicuous place at or near the entrance to the sexually oriented business so that it may be read at any time that the business is occupied by patrons or is open to the public. A sexually oriented business employee shall keep the employee’s license on his or her person or on the premises where the licensee is then working or performing.

§118.06   INSPECTION

Sexually oriented businesses and sexually oriented business employees shall permit the Chief of Police and his or her agents to inspect, from time to time on an occasional basis, the portions of the sexually oriented business premises where patrons are permitted, for the purpose of ensuring compliance with the specific regulations of this Chapter, during those times when the sexually oriented business is occupied by patrons or is open to the public. This section shall be narrowly construed by the City to authorize reasonable inspections of the licensed premises pursuant to this Chapter, but not to authorize a harassing or excessive pattern of inspections.

§118.07   EXPIRATION AND RENEWAL OF LICENSE

(a) Each license shall remain valid for a period of one calendar year from the date of issuance unless otherwise suspended or revoked. Such license may be renewed only by making application and payment of a fee as provided in this Chapter.

(c) The fact that any relevant conviction is being appealed shall have no effect on the revocation of the license, provided that, if any conviction which serves as a basis of a license revocation is overturned or reversed on appeal, that conviction shall be treated as null and of no effect for revocation purposes.

(d) When, after the notice and hearing procedure described in this Chapter, the City revokes a license, the revocation shall continue for one (1) year and the licensee shall not be issued a sexually oriented business license or sexually oriented business employee license for one (1) year from the date revocation becomes effective.

§118.10   HEARING; LICENSE DENIAL, SUSPENSION, REVOCATION; APPEAL

(a) When the Chief of Police issues a written notice of intent to deny, suspend, or revoke a license, the Chief of Police shall immediately send such notice, which shall include the
specific grounds under this Chapter for such action, to the applicant or licensee (respondent) by personal delivery or certified mail. The notice shall be directed to the most current business address or other mailing address on file with the Chief of Police for the respondent. The notice shall also set forth the following: The respondent shall have ten (10) days after the delivery of the written notice to submit, at the office of the Chief of Police, a written request for a hearing. If the respondent does not request a hearing within said ten (10) days, the Chief of Police’s written notice shall become a final denial, suspension, or revocation, as the case may be, on the thirtieth (30th) day after it is issued, and shall be subject to the provisions of subsection (b) of this Section.

If the respondent does make a written request for a hearing within said ten (10) days, then the Chief of Police shall, within ten (10) days after the submission of the request, send a notice to the respondent indicating the date, time, and place of the hearing. The hearing shall be conducted not less than ten (10) days nor more than twenty (20) days after the date that the hearing notice is issued. The City shall provide for the hearing to be transcribed.

At the hearing, the respondent shall have the opportunity to present all of respondent’s arguments and to be represented by counsel, present evidence and witnesses on his or her behalf, and cross-examine any of the Chief of Police’s witnesses. The Chief of Police shall also be represented by counsel, and shall bear the burden of proving the grounds for denying, suspending, or revoking the license. The hearing shall take no longer than two (2) days, unless extended at the request of the respondent to meet the requirements of due process and proper administration of justice. The Hearing Officer shall issue a final written decision, including specific reasons for the decision pursuant to this Chapter, to the respondent within five (5) days after the hearing.

If the decision is to deny, suspend, or revoke the license, the decision shall advise the respondent of the right to appeal such decision to a court of competent jurisdiction, and the decision shall not become effective until the thirtieth (30th) day after it is rendered. If the Hearing Officer’s decision finds that no grounds exist for denial, suspension, or revocation of the license, the Hearing Officer shall, contemporaneously with the issuance of the decision, order the Chief of Police to immediately withdraw the intent to deny, suspend, or revoke the license and to notify the respondent in writing by certified mail of such action. If the respondent is not yet licensed, the Chief of Police shall contemporaneously therewith issue the license to the applicant.

(b) If any court action challenging a licensing decision is initiated, the City shall prepare and transmit to the court a transcript of the hearing within thirty (30) days after receiving written notice of the filing of the court action. The City shall consent to expedited briefing and/or disposition of the action, shall comply with any expedited schedule set by the court, and shall facilitate prompt judicial review of the proceedings. The following shall apply to any sexually oriented business that is lawfully operating as a sexually oriented business, or any sexually oriented business employee that is lawfully employed as a sexually oriented business employee, on the date on which the completed business or employee application, as applicable, is filed with the Chief of Police: Upon the filing of any court action to appeal, challenge, restrain, or otherwise enjoin the City’s enforcement of any denial, suspension, or revocation of a Temporary License or annual license, the Chief of Police shall immediately issue the respondent
a Provisional License. The Provisional License shall allow the respondent to continue operation of the sexually oriented business or to continue employment as a sexually oriented business employee and will expire upon the court’s entry of a judgment on the respondent’s appeal or other action to restrain or otherwise enjoin the City’s enforcement.

The Chief of Police may waive the foregoing diagram for renewal applications if the applicant adopts a diagram that was previously submitted and certifies that the configuration of the premises has not been altered since it was prepared.

(2) It shall be the duty of the operator, and of any employees present on the premises, to ensure that no patron is permitted access to any area of the premises which has been designated as an area in which patrons will not be permitted.

Chapter, or any of the laws in force in the City, or to exempt anyone violating this code or any part of said laws from any liability which may be incurred.

(c) A first violation of this Chapter shall be punishable by a fine in the amount of two thousand five hundred dollars ($2,500.00). A second or subsequent violation of this Chapter shall be punishable by a fine in the amount of seven thousand five hundred dollars ($7,500.00). Each day a violation is committed, or permitted to continue, shall constitute a separate offense and shall be fined as such.

§118.16 APPLICABILITY OF CHAPTER TO EXISTING BUSINESSES

All preexisting sexually oriented businesses lawfully operating in the City in compliance with all state and local laws prior to the effective date of this Chapter, and all sexually oriented business employees working in the City prior to the effective date of this Chapter, are hereby granted a De Facto Temporary License to continue operation or employment for a period of ninety (90) days following the effective date of this Chapter. No person shall cover, obstruct, or obscure said sign.

§118.18   SCIENTER REQUIRED TO PROVE VIOLATION OR BUSINESS LICENSEE LIABILITY

This Chapter does not impose strict liability. Unless a culpable mental state is otherwise specified herein, a showing of a knowing or reckless mental state is necessary to establish a violation of a provision of this Chapter. Notwithstanding anything to the contrary, for the purposes of this Chapter, an act by an employee that constitutes grounds for suspension or revocation of that employee’s license shall be imputed to the sexually oriented business licensee for purposes of finding a violation of this Chapter, or for purposes of license denial, suspension, or revocation, only if an officer, director, or general partner, or a person who managed, supervised, or controlled the operation of the business premises, knowingly or recklessly allowed such act to occur on the premises. It shall be a defense to liability that the person to whom liability is imputed was powerless to prevent the act.

In the event that a City official is required to act or to do a thing pursuant to this Chapter within a prescribed time, and fails to act or to do such thing within the time prescribed, said failure shall not prevent the exercise of constitutional rights of an applicant or licensee. If the act required of the City official under this Chapter, and not completed in the time prescribed, includes approval of condition(s) necessary for approval by the City of an applicant or licensee’s application for a sexually oriented business license or a sexually oriented business employee’s license (including a renewal), the license shall be deemed granted and the business or employee allowed to commence operations or employment the day after the deadline for the City’s action has passed.

§118.20   SEVERABILITY

This Chapter and each section and provision of said Chapter hereunder, are hereby declared to be independent divisions and subdivisions and, notwithstanding any other evidence of legislative intent, it is hereby declared to be the controlling legislative intent that if any provisions of said Chapter, or the application thereof to any person or circumstance is held to be invalid, the remaining sections or provisions and the application of such sections and provisions to any person or circumstances other than those to which it is held invalid, shall not be affected thereby, and it is hereby declared that such sections and provisions would have been passed independently of such section or provision so known to be invalid. Should any procedural aspect
of this Chapter be invalidated, such invalidation shall not affect the enforceability of the substantive aspects of this Chapter.

PROCEDURE AND CONTENTS OF PLAT

§150.10  PRELIMINARY CONSIDERATIONS

In order to make the most of the opportunities relating to the subdivision and to conserve time, effort and expense, the owner or subdivider shall consult with the Commission and other public officials prior to the preparation of the tentative plan of the subdivision. The Master Plan should be reviewed to determine how the proposed plan will fit into the Master Plan. Requirements of the highway plan; school and recreational sites; shopping centers; community facilities; sanitation; water supply and drainage; and relationship to other developments, existing and proposed, in the vicinity, should be determined in advance of the subdivision plan. A thorough estimate of the situation will result in sound decisions with respect to the form, character and extent of the proposed subdivision. No land shall be subdivided for residential use unless adequate access to the land over improved streets or thoroughfares exists or will be provided by the subdivider, or if such land is considered by the Commission to be unsuitable for such use by reason of flooding or improper drainage.

§150.11  APPLICATION FOR PRIMARY APPROVAL OF A PLAT

The application shall contain a statement specifying the intentions of the owner respecting the proposed land use of the development, deed restrictions, drainage, sewage disposal, water facilities and the intended date of the development, and shall be accompanied by a receipt from the Clerk Treasurer showing that a filing fee has been paid in accordance with the current schedule of fees set and published by the Plan Commission. The primary plat must be submitted along with the filing fee no later than 28 days before the proposed hearing thereon. In addition to the aforesaid filing fee and following a determination of the Commission's mailing publication notice cost, the applicant shall pay and/or reimburse said cost to the Commission, in full, prior to said public hearing.

(12) Location and type of easements and any limitations on such easements;

(13) Information as to any agreements which have been entered into with the owners of other property within the neighborhood in which the proposed subdivision is located, as to general plans for the entire neighborhood. §150.13 HEARING PROCEDURE; ACTION BY COMMISSION

(A) Within 30 days after the date of receipt of the application for primary approval, the proposed plat and the filing fee, the Commission staff shall announce the date and time of the public hearing for primary approval of the plat to be held before the Commission. (4) To such other interested parties and in such manner as the Commission may designate by rule.

(B) The public hearing for primary approval of the proposed plat shall be conducted in accordance with such procedures as the Commission may adopt by rule.

(C) After public hearing upon the proposed plat, the Commission shall determine if the plat complies with and satisfies the standards prescribed for primary approval under this Chapter. Within a reasonable time after such hearing, the Commission shall either grant, with or without conditions, or deny primary approval of the proposed plat and enter written findings and a decision in accordance with such action, signed by any one of the following: The President, the Vice President, the Secretary or the Zoning Administrator for the Commission; provided, however, that if primary approval is denied, the written findings entered by the Commission shall set forth the
reasons for such denial. If primary approval is granted, the plat shall be certified on behalf of the Commission by any one of the officials named above.

(D) Notice of the Commission's decision upon the application for primary approval shall be provided by furnishing a copy of its written findings and decision to the applicant and to such remonstrators or other interested parties, if any, as the Commission may designate by rule. Such notice shall be furnished by the Zoning Administrator within five days after the Commission's decision in the manner prescribed by the Commission, by rule duly adopted.

(E) Primary approval of a plat by the Commission shall be valid for one year from the date of approval unless the applicant, prior to the expiration of such one-year period, shall have applied for and received the Commission's approval for an extension of time to obtain secondary approval. If by the expiration of such initial one-year period of time, or during any period of extension approved by the Commission, the applicant does not obtain secondary approval of all or part of the area included in the plat for which primary approval had been granted, then the primary approval granted for the plat shall lapse, and be considered as null and void. In the event the Commission grants secondary approval for only a portion of the plat, the applicant thereafter will not be obligated to adhere to any time limitations for requesting secondary approval of the remainder of the plat.

(C) The simultaneous intersection of streets resulting in traffic from more than four directions is prohibited.

(D) At street intersections, the property or right-of-way lines of corner lots shall be rounded at the street intersection corner with an arc which shall have a minimum radius of at least ten feet drawn tangent to each of the intersecting property lines.

(E) When one or more of the streets involved in an intersection is a boulevard, minor collector, arterial or collector street or expressway or freeway, the foregoing minimum standards may be increased by the Commission.

(F) Alleys with a minimum width or right-of-way of 20 feet may be required in all business, commercial, and industrial districts. Except where justified by unusual conditions, alleys will not be permitted in residential districts.

(G) No dead-end street shall be permitted where the same is in conflict with the Master Plan. No permitted dead-end street shall provide principle frontage to more than 20 lots. Every permitted dead-end street shall terminate in a circular right-of-way with a minimum diameter of 100 feet. The said street shall terminate with a paved turn-around with a minimum outside curb diameter of 75 feet, unless the Commission approves an equally safe and convenient form of paved space instead of the required turning circle. Temporary dead-end streets will be permitted where the approved primary plat shows that the street will be extended to conform to the provisions of this Chapter. A circular right-of-way in excess of the required street right-of-way at the termination of a temporary dead-end street shall not be required.

(H) The minimum radius of horizontal curvature measured on the centerline of the street shall be:

Between reversed horizontal curves there shall be a tangent of at least 25 feet, or more if the Commission deems it appropriate because of the sharpness of the curves.
Wherever there exists a dedicated or platted portion of a street or alley or easement adjacent to the proposed subdivision, the continuation of the street, alley or easement right-of-way to the prescribed width shall be platted within the proposed subdivision unless the Commission finds it unnecessary.

In no case shall the name of any street, road, drive or avenue already in use or established by plat anywhere in the City be used except in the case of a direct extension, and in no instance shall any street name include the word north, south, east or west, unless it denotes a geographic location.

Any street subject to the provisions of this Chapter shall be constructed in such a manner as to permit acceptance into the City Street Maintenance Program, and shall be dedicated to the public for their usual and intended purpose; provided, however, that the requirements for street construction and dedication specified in this Chapter may be waived by the Commission, where permitted by this Chapter. Following completion into said Maintenance Program, any necessary maintenance bond(s) shall be timely filed in accordance with this Chapter.

§150.27 BLOCKS

(A) Blocks shall not exceed 1,320 feet in length unless unusual circumstances justify a greater length.

(B) Whenever possible, blocks shall be of sufficient dimension to allow two tiers of lots of appropriate depth.

§150.28 LOTS

(A) All lots shall abut on a street which is accessible to an established public street already in use.

(B) Side lines generally shall be at right angles to straight street, and radial to curved street lines.

(C) Lot dimensions and areas shall not be less than the minimum specified by the City Zoning Code, as now or hereafter amended, for the district in which the lot is located.

(D) Provisions shall be made in the subdivision design and restrictions for off-street parking as required by the City Zoning Code, as now or hereafter amended.

(E) Whenever lots which front on two or more streets are platted along arterial streets, collector streets or limited access highways as shown in the Master Plan, the design shall be such that access to these lots shall be only from an interior street.

§150.29 EASEMENTS
(A) Where alleys are not provided, easements shall be provided for utilities, sewers and storm drains. Such easements shall generally be located along rear or side lot lines in which case a minimum width of 14 feet, seven feet on each side of the lot line, shall be provided, or if such easement is within a lot, the total minimum width of 14 feet shall be provided. Easements shall be so laid out that a proper continuity may be had for utilities from block to block.

(B) In order to protect stream banks and to allow the maintenance or reconstruction of any legal open drain or of any open drain intended primarily for the conveyance of natural drainage or storm drainage, and in order to meet the needs of the Allen County Drainage Board under authority of Chapter 305, Acts of 1965, General Assembly of the State of Indiana, and all Acts amendatory thereto, open drainage easements shall be provided as follows:

   (1) Not less than 30 feet in width beyond the top of one bank of any legal drain and not less than five feet in width beyond the top of the second bank, with the measurement between the tops of bank being approved by the Allen County Surveyor and with the whole being arranged and approved by the Allen County Surveyor so as to permit the reconstruction of the drain in a particular manner;

   (2) No open drainage easement shall be less than 50 feet in width or shall be other than off-set as indicated immediately above;

   (3) No trees or permanent structure above grade, including such structures for the use of any private or franchised public utility, shall be permitted in any open drainage easement, and the protective covenants running with the land shall so state; structures below grade and for the use of a franchised public utility may be permitted within the wider side of an open drainage easement when adjacent to the outer edge of said wider side;

   (4) At the risk of the landowner as indicated by Section 601 of the above Chapter 305, Acts of 1965, temporary structures, fences, or shrubs or bushes for decorative purposes, are permitted within an open drainage easement only if not within five feet of the top of bank, and the protective covenants running with the land shall so state.

(C) In order to protect river banks and to allow for widening or relocating, an easement of 30 feet (or more as may be required by the County Surveyor) measured from the low water line along each bank of any river shall be provided.

(D) A guy line easement of five feet in width and 20 feet in length, bisecting the obtuse angle of any deflection in the centerline of a utility easement, shall be provided. Said easement length shall be measured from the apex of the deflection angle.

(E) Every plat shall contain a statement to the effect that all utility easements as dedicated on the face of the plat shall be kept free of all permanent structures and the removal of any obstruction by a utility company shall in no way obligate the utility company in damages or to restore the obstruction to its original form.

§150.30 MARKERS
The intersection of all boundary lines at the exterior boundaries of a plat shall be marked by a galvanized or wrought iron pipe or iron steel bar at least two feet in length and not less than one inch in diameter. Such marker shall be set so that the center of the marker will coincide exactly with the intersection of the lot or property lines at that point and shall be set so that the top of the marker is level with the surface of the surrounding ground.

§150.31 FLOOD PLAIN MANAGEMENT

In addition to the flood plain management provisions found in the Zoning Code, the Plan Commission shall review each plat to insure that:

(A) All such proposed developments are consistent with the need to minimize flood damage.

(B) Adequate drainage is provided so as to reduce exposure to flood hazard.

(C) Adequate drainage is provided so as not to increase the exposure of flood hazard to adjacent lands.

(D) All public utilities and facilities are located and constructed so as to minimize and eliminate flood damage. These facilities and utilities include but are not limited to sewer, gas, electric and water systems.

IMPROVEMENT PROVISIONS

§150.45 STREETS

(A) Streets shall be completed to grades shown on the plat, profiles, and cross sections as approved by the Board.

(B) Streets shall be improved to the minimum widths as follows:

(1) Local streets.

(a) Two-way streets:

[1] 27 feet if curbs are used (may be 23 feet when there is off-street parking for eight cars on each lot and low traffic potential).

[2] 22 feet if curbs are not used (may be 20 feet when there is off-street parking for eight cars on each lot and low traffic potential).

(b) One-way streets: 20 feet if curbs are used; 18 feet if curbs are not used.

(2) Low volume streets.
(a) Two-way streets:

[1] 27 feet if curbs are used (may be 23 feet when there is off-street parking for eight cars on each lot).

[2] 22 feet if curbs are not used (may be 20 feet when there is off-street parking for eight cars on each lot).

(b) One-way streets: 20 feet if curbs are used; 18 feet if curbs are not used.

(3) Low-volume aggregate streets: 22 feet if curbs are used, except:

(a) Boulevard: 18 feet per traffic lane if curbs are not used.

(b) Minor collector: As determined by the City Plan Commission and the City Engineer.

(c) Industrial street: 27 feet with curbs.

(d) Collector street: 33 feet with curbs.

(e) Arterial street: 37 feet with curbs.

(C) The street, according to its type, shall be graded, surfaced and improved to the dimensions required by the cross sections, and the work shall be performed in the manner prescribed by the Board.

(D) The Commission may waive or modify the above requirements of this Section for limited volume streets when the curb and gutter requirement has been waived as provided for in §150.46(B) below of this Chapter provided that a condition is placed upon said waiver that a restrictive covenant be included in the plat containing said street, which names the street and lot numbers having access to the street and contains the following statement:

"MAINTENANCE PROVISION NOTICE BY BOARD OF WORKS AND SAFETY - Until such time as the above named street is constructed to meet the required specifications and provisions established as street maintenance criteria by the Board, said street or road will not be included in the New Haven Street Maintenance Program."

§150.46 CURBS AND GUTTERS

(A) The Commission shall require curb and gutter to be installed on each side of any street surface, except as hereinafter set forth in this Section, constructed of plain Portland cement, concrete, or molded asphaltic concrete, or other materials acceptable to the Board. They may be either the vertical curb, the roll curb, integral curb and gutter, or separate curb and gutter type.
(B) The Commission may permit the omission of curbs and gutters in any subdivision when final topography, street longitudinal profile, and drainage system design are acceptable to the Commission; when adequate provisions are made in the protective covenants running with the land to permit access to and freedom from obstruction of the drainage system; and when the street is properly acceptable to the Commission as a local street, low-volume street, low-volume aggregate street, or boulevard street; and provided that every lot fronting thereon shall have a minimum lot area of 40,000 square feet, and provided further that the minimum lot width of all lots fronting thereon is 150 feet.

(C) The provisions of this Chapter shall apply to any existing recorded subdivision plat approved by the Commission, provided the owners of record of more than 50% of the said platted subdivision real estate file application for omission of curbs and gutters under this Section, and there being legal notice thereof (in a manner of a primary plat) establishing a time and place of public hearing and/or curb and gutter requirement be omitted as set forth above.

§150.47 SIDEWALKS

(A) Grading of the entire right-of-way shall be provided for the location of sidewalks one foot from front lot lines and a proper grade shall be provided by the developer according to standards shown on plans, profiles, and cross sections approved by the Board.

(B) Sidewalks shall be provided by the developer on each side of all streets within the subdivision; provided, however, the Commission may waive or amend the above requirements only in those subdivisions with less than two lots per gross acre and only upon showing by the developer that sidewalks will serve no specific or future need.

(C) All required sidewalks shall be designed and installed to comply with the Americans with Disabilities Act, and with all rules and regulations promulgated thereunder, including but not limited to Public Right of Way Accessibility Guidelines, in effect at the time of the design and installation as may be amended from time to time.

[Ord. Z-13-16, passed 11-12-13]

§150.48 SANITARY SEWAGE DISPOSAL

The developer shall install, or cause to be installed, a system for the disposal of sanitary sewage in the subdivision by one of the following means:

(A) Public system. A complete sanitary sewer system which shall convey the sewage into an established municipal or other public agency sanitary sewage disposal and treatment system, at a point and in a manner approved in writing by the municipal or other public agency involved. The plans for the complete installation of the sewage system showing all locations, material size, profiles and any connections thereto, shall be prepared by a registered engineer at the
expense of the subdivider or developer and shall be approved by and meet the requirements of the affected municipal or other public agency.

(B) Private or quasi-public system. A public or quasi-public sanitary sewage system shall consist of either of the following:

(1) A complete sanitary sewage system to convey the sewage to a treatment plant provided by the developers or others in accordance with the requirements of the Board and Board of Health.

(2) A complete sanitary sewer system which shall connect into the sanitary sewage system of a sewage disposal company which shall hold a certificate of territorial authority issued by the Public Service Commission of Indiana, authorizing such sewage disposal service for the area in which the subdivision is located. The plans for the complete installation of the sewer system within the subdivision showing all locations, size, material, profiles, and capacities shall be submitted to and be approved by the Board and the Board of Health.
(C) **Septic tanks.** If the developer submits acceptable evidence to the Board and the Plan Commission that neither of the above forms of sewage disposal and treatment is necessary due to the low density of the proposed development or the lack of limiting development to existing or planned (public or quasi-public) sanitary systems, then the Commission may permit the use of private sanitary sewage of a septic tank and absorption field or other approved treatment system, when laid out in accordance with the standards and approval of the Board or the State Board of Health.

§150.49 **WATER SUPPLY AND STORM SEWERS**

(A) **Water supply.** The developer shall install or cause to be installed a water system for the subdivision by one of the following methods:

1. **Public system.** A public system consisting of a complete water main system which shall be connected to a public or other community water supply which is approved by the City. The plans for the complete installation showing the size, location, depth, material, and all connections thereto including fire hydrants, shall meet the requirements and receive the approval of the Board.

2. **Private system.** A private system consisting of:

   a. A community water supply system including well, pump, and all appurtenances thereto, necessary to supply a minimum pressure of 40 pounds per square inch. The plans showing location, depth, size, and material of mains, valves, and connections thereto shall meet the requirements of and be approved by the Board and State Board of Health; or

   b. A complete water main system which shall connect into the water main system of a utility company which shall be authorized to operate within the area in which the subdivision is located and which shall be subject to the control of the Public Service Commission of Indiana. The plans for the complete installation of the water main system within the subdivision showing size, location, depth, material, and all connections thereto, including fire hydrants, shall be approved by and meet the requirements of the Board.

3. **Individual supply.** If the developer submits acceptable evidence to the Board and the Plan Commission that neither of the above forms of water supply is necessary due to the low density of the development, the lack of limiting physical site condition, and the proximity of the development to existing or planned (public or quasi-public) water systems, then the Commission may permit an individual water supply on each lot in the development subject to compliance with all requirements and approval of the Board or State Board of Health.

(B) **Storm sewers.** An adequate storm water system with surface inlets shall be installed by the subdivider. The plans for the drainage of the subdivision showing topography,
direction of flow, size, location, material, profiles, and all connections thereto, shall meet the requirements of and be approved by the County Surveyor.

§150.50 STREET SIGNS AND RECREATION SPACE

(A) Street signs. Standard City street signs shall be provided and installed by the subdivider or developer at all street intersections at the direction of the Commission.

(B) Recreation space.

(1) Commission-approved recreation space shall be provided in all subdivisions wherein the minimum net lot area is less than 12,000 square feet. The purpose of this space shall be to meet the immediate and future recreation needs of the subdivision's residents in a neighborhood setting. Recreation space shall be provided at the rate of 750 square feet per dwelling unit.

(2) Recreation space may be provided in a centrally located site, in distinctly separated sites or connecting links between separated activity areas, or adjacent to other existing or proposed recreation spaces. The Commission shall determine if the proposed space is suitable for the intended use.

(3) This requirement may be waived when, in the opinion of the Commission, the applicant has satisfactorily demonstrated that he has provided alternative methods for meeting the recreational needs of his subdivision's residents or the resulting open space is less than 10,000 square feet.

(4) All subdivisions with recreation space must contain acceptable covenants which, in the opinion of the Commission, insure adequate maintenance of those recreation spaces.

SECONDARY APPROVAL OF PLAT

§150.60 PROCEDURE AND CONDITIONS

(A) Procedure. Following the granting by the Commission of primary approval of a plat, the applicant shall notify the Zoning Administrator for the Commission of his intent to seek secondary approval of either all or a portion of the plat. In the event the applicant intends to seek secondary approval of only a portion of the plat, the applicant shall specifically describe and designate such area so as to reasonably identify the same. The applicant shall also at that time file with the Commission staff the plat in the form and with the contents prescribed hereinafter. The Zoning Administrator shall then cause to be scheduled a meeting of the Commission for the purpose of reviewing the plat and determining whether secondary approval shall be granted, and provide notice to the applicant of the date and time of such meeting. No other notice of such meeting need be given, except as required by law. The Commission staff shall then review all
submissions made by the applicant to insure the requirements for secondary approval stated in this Chapter have been satisfied and make a recommendation to the Commission for the granting or denial of secondary approval of the plat.

(B) **Conditions.** The Commission will consider secondary approval of a plat only after the applicant has accomplished the following:

1. Filed with the Commission a complete set of plans and specifications for the development of all street, sewers, water supply and other utilities and facilities in the subdivision in accordance with the requirements of this Chapter; and

2. Installed all of the improvements required by this Chapter, in accordance therewith and in accordance with the said plans and specifications on file, and delivered to or filed with the Commission all necessary approvals and acceptances from all applicable agencies and authorities;

3. In the event all of such improvements have not been so installed, accomplish one of the following:

   (a) Filed with the Commission, for those improvements already installed, if any, all necessary approvals and acceptances from all applicable agencies and authorities.

   (b) Executed and posted with the Commission a performance bond, in accordance with the regulations adopted by the Commission, to insure installation, acceptance and approval of the improvements as shown by said plans and specifications for the subdivision filed with the Commission which bond shall:

      [1] Be in an amount determined by the Commission to be sufficient to complete the improvements and installation in accordance with this Chapter;

      [2] Provide surety satisfactory to the Commission;

      [3] Run to the Commission; and

      [4] Specify the time for completion of the improvements and installation.

   (c) If a performance bond required under this Chapter is posted with the Commission by an applicant, any funds received from such performance bond shall be used by the Board only for completion of the improvements for which the bond was provided and for which there was no prior appropriation. The Commission may make, or cause to be made, such improvement and installations. Upon submission by the developer of the document required under the regulations adopted by the Commission, or its duly authorized representative, shall release
such performance bond and discharge the developer and surety, if any, from further liability or responsibility thereunder.

(4) Paid in full to the Commission all costs incurred for the furnishing of notice required under this Chapter and/or by rule of the granting of primary approval of the plat by the Commission.

(5) Filed with the Commission the plat in the form and with the contents prescribed hereinafter.

§150.61 FORM AND CONTENTS OF PLAT

(A) Form of plat. The plat for which secondary approval is sought shall be submitted to the Commission in the form of an original tracing on tracing cloth or tracing paper, in ink, and shall be a complete and accurate layout drawn to scale acceptable to the Commission staff and shall contain all additions, corrections and deletions required by the Commission.

(B) Contents of plat. The plat for which secondary approval is sought shall also contain and show the following:

§150.62 ACTION BY PLAN COMMISSION; CERTIFICATION AND RECORDING OF PLAT

(A) Action by the Plan Commission.

(1) Within a reasonable time following the applicant's satisfaction of all requirements stated under this Subchapter, the Commission shall either grant, with or without conditions, or deny secondary approval of the plat. If secondary approval is denied, the Commission shall, within three days thereafter, furnish the applicant with a written list of the reasons for such denial.

(2) If secondary approval is granted by the Commission, all certifications required under this Subchapter shall be obtained by the applicant prior to recording, and the plat shall be signed and certified on behalf of the Commission by one of the following: the President, the Vice President, the Secretary or the Zoning Administrator for the Commission.
(3) The Commission may grant secondary approval of the plat subject to the expiration of time provided for appeal under IC 36-7-4-708 of the primary approval of the plat; provided, however, that the plat for which secondary approval has been granted shall not be signed or certified by the Commission, prior to the expiration of such appeal period.

(4) Notwithstanding the requirements of this Chapter for submission to the Commission of certain approvals for improvements installed, the Commission may, upon written request by the applicant supported by evidence that all submissions have been timely filed, grant secondary approval of a plat although one or more of such approvals may not have been delivered to or received by the Commission. The Commission may grant such secondary approval only when the applicant provides a written statement made under oath and approved by the Commission for recordation as a supplement to the protective covenants, stating that the applicant will cause to be provided at his cost all things necessary to attain or accomplish the delivery of the required approval(s) which shall not then have been delivered to or received by the Commission. If the developer does not then deliver such approval(s) in a timely fashion, the Commission is hereby empowered to refuse to issue either Improvement Location Permits or Certificate of Occupancy Permits. Once the applicant has thereafter secured and delivered to the Commission the required approval(s), the Zoning Administrator shall then execute a recordable document, which shall be recorded by the applicant at his expense, rescinding the aforesaid supplement to the protective covenants.

(B) Certification and recording of plat.

(1) Certification. In addition to the execution and certification of the Commission, each plat submitted to the Commission for secondary approval shall contain the following:

(a) Certificate forms indicating the approval by the Board, the Allen County Surveyor, and the Board of Health (when required). The style and wording of such forms shall be as prescribed by the Commission;

(b) A statement in substantially the following form:

"We _____________ the undersigned, owners by virtue of that certain deed shown in Deed Record ____, page ___ or (Document No._____), in the office of the Recorder of Allen County, Indiana, of the real estate shown and described herein, do hereby lay off, plat and subdivide, said real estate in accordance with the information shown on the final plat. This subdivision shall be known and designated as ______________ an addition to ___________________________; and

(c) A certificate signed by a land surveyor, registered in the State of Indiana, in substantially the following form:
"I ____________, hereby certify that I am a Land Surveyor licensed in compliance with the laws of the State of Indiana; that this plat correctly represents a survey completed by me on ______________; that all markers shown thereon actually exist; and that their locations, size, type and material are accurately shown.

(2) **Recording procedures.** Within one year of the granting of secondary approval of the original of said plat, in its final form and with all required contents, and any restrictive covenants, as approved by the Commission, together with a money order, cashier's or certified check, or cash equal to the total cost of recording said plat in the office of the Recorder of Allen County, Indiana; upon receipt of said plat, the Zoning Administrator shall satisfy himself that the plat submitted for recordation complies strictly in its form and contents with the plat for which secondary approval was granted by the Commission. The Zoning Administrator shall forthwith thereafter have the plat signed and certified for and on behalf of the Commission by one of the officials designated in this Chapter and shall cause such plat to be duly recorded. In the event a plat for which secondary approval has been granted by the Commission has not been submitted to the Zoning Administrator for certification and recordation within the aforesaid period of time, or in the event any recorded plat fails to contain on its face the required signature and certifications, the approval of the Commission shall be deemed to be automatically withdrawn and the plat shall be deemed to be of no force or effect.

§151.006 INTERPRETATION OF ZONING MAP

Where, due to the scale, lack of detail, or illegibility of the zoning map, there is an uncertainty, contradiction, or conflict as to the intended location of any zoning district boundary as shown thereon, the Zoning Administrator shall make an interpretation of the map on the request of any person. Any person aggrieved by any such interpretation may appeal the interpretation to the Board of Zoning Appeals. The Zoning Administrator and the Board of Zoning Appeals, in interpreting the zoning map or deciding any appeal, shall apply the following standards:
(A) Zoning district boundary lines are intended to follow lot lines, or be parallel or perpendicular thereto, or along the center line of alleys or streets, or along water courses, contour lines, or other similar established lines.

(B) Where zoning district boundary lines are so indicated that they approximately follow lot lines, the lot lines shall be construed to be the boundary lines.

(C) Where a zoning district boundary line divides a lot, the location of any such zoning district boundary line, unless indicated by dimensions shown on the zoning map, shall be determined by the use of the map scale shown thereon.

(D) If, after the application of the foregoing rules, uncertainty still exists as to the exact location of a zoning district boundary line, or the physical or cultural features existing on the ground are at variance with those shown on the official zoning map, the boundary line shall be determined in a reasonable manner, considering the history of uses of property and the history of zoning ordinances and amendments.

(E) If the exact location of the FW (Floodway) or FF (Floodway Fringe) District boundary line cannot be determined from the zoning maps, the Zoning Administrator shall refer to the Floodway Map, the Flood Insurance Rate Map, and the Flood Insurance Study prepared by the Federal Emergency Management Agency in making a determination.

Complete detailed plans, specifications, geologic and hydro-geologic and drainage information and the like required in §151.077 paragraph (D) must accompany the application for the final hearing. The granting of a preliminary approval shall in no manner be deemed to commit the Board to any final approval in the event that final data reveals limitations or conditions which would render the proposal detrimental to the area, or if final plans be incomplete, inadequate, or unacceptable.

[Ord. Z-96-9, passed 9-22-96]

§151.079 APPROVAL REQUIREMENTS

(A) The applicant will be required to demonstrate to the satisfaction of the Board of Zoning Appeals that the siting of a new landfill, building material debris disposal site, or waste facility, or the expansion of an existing landfill, building material debris disposal site, or waste facility, is in the public interest, would not unduly effect property values in the City, the adjoining township, or the adjoining county, and would serve the public convenience and necessity. The Board of Zoning Appeals will have discretion to determine whether these standards have been met.

(B) In connection with its consideration of the application, the Board of Zoning Appeals shall consider:
(1) The existing geological and hydro-geological characteristics of the site.

(2) The monitoring program proposed by the applicant such as to protect groundwater quality.

(3) An assessment of the environmental impact.

Those portions of the site's roadways which are within 150 feet of the public street or streets serving the facility shall be maintained in a state so as to avoid blowing dust problems. In the event a landfill, building material debris disposal site, or waste facility is proposed on a site which has no frontage on a public right-of-way and is served by an easement or access road, the 125-foot dimensional requirement may be waived by the Board if the Board deems it appropriate.

(J) Conditions unfavorable for the production of insects and rodents shall be maintained by carrying out routine landfill or building material debris disposal operations in a systematic manner. Supplemental insect and rodent control measures shall be instituted whenever necessary as determined by the Zoning Administrator or the Indiana Department of Environmental Management.

§151.091  FW AND FF FLOOD HAZARD DISTRICTS

(A)  Purpose.

(1) The Flood Hazard Districts are established to limit development in the flood-prone areas near any water course, protecting the public health, safety, and welfare while minimizing the financial burden and inconvenience imposed on the individual property owners and the general public through periodic floods and overflow of water onto land.

(2) The Flood Hazard District is divided into two subdistricts: the FW (Floodway) District and the FF (Floodway Fringe) District. These subdistricts provide an additional measure of protection where flooding potential has been identified. The subdistrict requirements and limitations are additional to all other provisions of the principal zoning designation for which the real estate has been classified.

(B)  Permitted Uses.

(1) FW (Floodway) District. Uses permitted in the FW (Floodway) District shall be regulated by the Indiana Natural Resources Commission as established in IC 13-2-22-14. However, in no instance may a use be permitted in the FW (Floodway) District which is not a permitted use in the principal zoning designation established for the real estate by §151.096 herein. The boundaries of the FW District as delineated on the floodway map prepared and approved by the Federal Emergency Management Agency are overlaid on the official zoning maps. The Zoning Code may also classify additional areas within the FW (Floodway) District based upon the best information available for those streams or stream segments not included on the Floodway Map.

(2) FF (Floodway Fringe) District.

(a) All uses permitted in the respective principal zoning district shall be permitted. However, prior to the issuance of an Improvement Location Permit within an FF District, the Zoning Administrator shall establish a minimum flood protection grade. The flood protection grade shall be two feet above the Regulatory Flood Profile as established in the Flood Insurance Study for the City.

(b) The boundaries of the FF (Floodway Fringe) District are delineated on the Flood Insurance Rate Map as those areas subject to flood hazard from the
regulatory flood which are outside the boundaries of the regulatory floodway. The FF District boundaries are overlaid on the official zoning maps. The Zoning Code may also classify additional areas within the FF District based upon the best information available for those streams or stream segments not included in the Flood Insurance Rate Map.

(c) Nonresidential structures may be constructed within the FF (Floodway Fringe) District below the minimum flood protection grade provided:

[1] The structure shall be flood-proofed as defined herein to an elevation two feet above the Regulatory Flood Profile.

[2] All flood-proofed buildings shall be constructed to withstand the flood depths, pressures, velocities, impact, and uplift forces and other factors associated with the regulatory flood.

[3] The plans and specifications for all necessary structural facilities and modifications are certified by a professional engineer or registered architect licensed in the State.

[4] The use of the structure complies with all provisions of the applicable principal zoning designation for which the real estate is classified.

(C) Floor elevation record. A record of the lowest floor elevation for any new improvement within an FW or FF District shall be maintained by the Zoning Administrator. The elevation shall be furnished to the Zoning Administrator at the time of application for the Improvement Location Permit.

(D) Warning and disclaimer of liability. The degree of flood protection required by this Chapter is considered reasonable for regulatory purposes and is based on engineering and scientific considerations. Larger floods can and will occur on rare occasions. Flood heights may be increased by man-made or natural causes, such as ice and debris jams. This Chapter does not imply that real estate outside of delineated flood hazard areas, as defined herein, will be free from flooding or flood damages. This Chapter does not create liability on the part of the State, the Indiana Natural Resources Commission, the City, or the Plan Commission, or any elected or appointed official or employee thereof for any flood damages that result from reliance on this rule or any administrative decision lawfully made thereunder.

(b) Permitted uses include all C-2C uses.

(C) **Exceptions to subdistrict requirements.** The Plan Commission, to enhance a degree of flexibility in shopping center development, may grant requests for exceptions to the subdistrict requirements as set forth in (B) above; however, the Commission may not waive the 25% maximum site coverage by buildings or the maximum gross floor area of enclosed space for the entire center as set forth for each subdistrict. Exceptions may only be granted after the request has been reviewed at a public hearing, which hearing may be held in conjunction with a request for development plan approval, and if the Commission finds that:

1. The intent and spirit of the requirements of this Chapter as they relate to the zoning subdistrict are met; and
2. The exception is not contrary to the public interest; and
3. The intent of the master plan as it relates to commercial policies is met.

(D) **Submission procedures and requirements.**

(3) Sight screening. Screening shall be used as a means to separate the shopping center from adjacent land uses when deemed necessary by the Commission. The degree and type of screening necessary to separate adjacent real estate will be based on the intensity and nature of surrounding land uses. In determining the amount of earth berming to be considered as landscaping, the Commission will use as a guide the degree and type of berming proposed, as well as its effectiveness in meeting the landscaping intent.

(4) Traffic. A proposed shopping center development plan must provide facilities to minimize conflicts between the traffic generation resulting from the shopping center and traffic on existing or proposed streets and highways. Methods to improve traffic flow which may be required include, but are not limited to, the following:

(a) Road or street widening.

(b) Acceleration and deceleration lanes.

(2) Existing trees and other natural features shall be preserved whenever possible. The location of these features must be considered when planning common open space, location of buildings, underground services, walks, paved areas, and finished
grade levels. The Commission may inquire into the means whereby natural features will be protected during construction.

(B) Building separation. In reviewing the location of all structures within the development plan boundaries, the Commission shall determine that the structures are located to allow adequate light, air, ease of entry, and access by emergency vehicles. For those districts without specified yard requirements, the Commission shall be guided by the following:

(1) That the open areas provided around the building be sufficient to provide the occupants of the structure with adequate light and air from all outside walls which contain windows or doors.

(2) That sufficient space is provided for access and entry to buildings from all streets, parking lots, and other buildings.

(3) That in the event lots for one-family or two-family dwellings are to be sold prior to construction and the applicant cannot indicate structures on the development plan, the structures shall be subject to the yard provisions of §151.131 for the RS-1 District or other Commission-approved minimums, unless specifically waived.

(C) Vehicular circulation facilities.

(1) In determining the number of driveway entrances, widths of pavement and driveways, and the width and length of acceleration, deceleration and passing lanes, the Commission will consult standards as set forth in the "Access Standards Manual for Fort Wayne, New Haven and Allen County."

(2) All right-of-way widths and street improvements must meet the requirements of Chapter 150 as now or hereafter amended. However, those requirements may be waived on approval of the City Engineer and the Commission. All streets shall be surfaced to meet City street specifications governed by street classification.

(D) Pedestrian circulation facilities. Pedestrian walkways shall be constructed in a location and to specifications approved by the Commission. The walkways shall provide for pedestrian circulation throughout the development and shall be separated from vehicular traffic. Where distance separation cannot be achieved, physical separation may be required in cases in which the Commission deems necessary. All required pedestrian facilities shall be designed and installed to comply with the Americans with Disabilities Act, and with all rules and regulations promulgated thereunder, including but not limited to the Public Right of Way Accessibility Guidelines, in effect at the time of the design and installation, as may be amended from time to time.

(E) Sanitary sewage disposal and water supply systems. All water supply and sanitary sewage disposal systems, from private to public in nature, shall be subject to compliance with local, and where appropriate, State Board of Health requirements. Plans must be submitted to and approved by the responsible agencies.
(F) Recreation space.

(1) The specific requirements for the amount and type of recreation space are contained in those parts of this Chapter dealing with specific zoning district requirements. The following standards are to be utilized in the evaluation of all required recreation space in a Commission-approved development plan:

(a) Commission-approved recreation space shall be provided in all RS-P, RS-3, and MH districts. The purpose of providing the space shall be to meet the immediate and future recreational needs of the development's residents in a neighborhood setting. Recreation space may be provided in a centrally located site, in distinctly separated sites, as connecting links between separated activity areas, or adjacent to other existing or proposed recreation spaces. The Commission shall determine if the proposed recreation space is suitable for the intended use. This requirement may be waived when, in the opinion of the Commission, the applicant has satisfactorily demonstrated that he has provided alternative methods for meeting the recreational needs of his development's residents or the resulting open space is less than 10,000 square feet.

(b) All developments with recreation space must contain acceptable covenants which, in the opinion of the Commission, insure adequate maintenance of those recreation spaces, when applicable. If the developer proposes to convey the ownership of the recreation space to the Park and Recreation Board, the Commission must be in receipt of written documentation from the Park and Recreation Board, acknowledging its agreement to accept ownership and maintenance of same.

(2) The term recreation space shall be interpreted to mean void of non-recreational structures, street rights-of-way, open parking areas and driveways for dwellings.

(3) Space intended for limited recreational or other uses, such as a golf course, to which all residents of the development may not be permitted free access because of the payment of a fee or a charge, shall have a maximum of three-fourths of the space utilized in meeting the recreation space requirements of the total development.

(G) Paving. All access drives and off-street parking facilities shall either be paved with concrete or with other approved surfacing material to adequately provide a durable and dust-free surface.

(H) Parking standards.

(1) Parking areas may be required to be arranged so as to prevent through traffic to other parking areas.
(2) Parking areas shall be screened from adjacent non-related structures, roads, and traffic arteries with plantings, earth berms, walls, or changes in grade, when deemed necessary by the Commission.

(3) All parking areas shall be marked so as to provide for orderly and safe parking, storage, and movement.

(4) When it is in the interest of safety and better vehicle and pedestrian circulation, the Plan Commission may require the use of landscape elements to provide physical separation of use areas.

(5) All parking areas shall be adequately lighted. All such lighting shall be so arranged as to direct light away from adjoining residential real estate.

(6) All parking areas and off-street loading areas shall be graded and drained to remove all surface water without erosion and flooding.

(I) Street lighting. Street lighting shall be provided in all residential developments. Alternative street lighting proposals will be considered by the Commission if found to be appropriate in scale and intensity. Where pedestrian facilities are separated from streets to the extent that they are not adequately lighted from the street light facilities, separate lighting facilities shall be provided on the pedestrian facilities.

(J) Flood plain management. In addition to flood plain management provisions found elsewhere in this Chapter, the Plan Commission shall review each development plan to insure that:

(1) All such proposed developments are consistent with the need to minimize flood damage.

(2) Adequate drainage is provided so as to reduce exposure to flood hazard.

(3) Adequate drainage is provided so as not to increase the exposure of flood hazard to adjacent lands.

(4) All public utilities and facilities are located and constructed so as to minimize and eliminate flood damage. These facilities and utilities include, but are not limited to, sewer, gas, electric and water systems.

§151.118 ACCESS ROADS

This Section provides a plan to require private construction and maintenance of access roads at certain locations, based upon the following requirements:
(A) The purpose of the access road plan is to achieve a reduction in traffic conflicts and congestion and enhance traffic safety by limiting the number of access points onto major streets from adjacent real estate.

(B) On real estate located adjacent to the streets, roads and highways described in paragraph (F), there shall be constructed access roads, appropriate permanent accesses to access roads from public rights-of-way, and necessary right-of-way improvements, in order to achieve the purpose stated in paragraph (A).

(C) An owner of real estate shall construct, at the owner's expense, such access roads, permanent accesses, and right-of-way improvements as may be required by the New Haven Plan Commission.

(D) The access roads and permanent accesses to them shall be privately maintained by the owner of the property on which an access road or access is located, except for such portion of a permanent access which the City of New Haven agrees to maintain.

(E) The New Haven Plan Commission shall be authorized to do the following:

1. Adopt written plans describing the specific areas where access roads will be located, and the manner and timing of their construction.

2. Designate documentation necessary to implement the access road plan.

3. Designate the specifications for construction of access roads, permanent accesses and right-of-way improvements.

4. Adopt such rules as it may deem necessary to implement the access road plan as stated in the Comprehensive Plan.

5. Impose construction of an access road, permanent access, or right-of-way improvements as a condition of the issuance of an Improvement Location Permit or a Certificate of Occupancy, unless the New Haven Plan Commission permits the owner to make a written commitment for such installation at a later time.

6. Require an access to a public right-of-way from real estate upon which an access road is located to remain only temporarily, and to be removed or closed at such time as connection to a permanent access is possible.

7. Enforce a violation or breach of an obligation to construct or maintain an access road or permanent access, construct right-of-way improvements, or remove a temporary access, which might be required under this Comprehensive Plan, an access road plan, a rule of the New Haven Plan Commission, or any other related commitment or document. The remedies available for such enforcement shall include any legal or
equitable remedies available, including injunctive relief and recovery of attorney fees, costs and expenses incurred in connection with such proceedings.

(F) The New Haven Plan Commission shall be authorized to require access roads to be constructed along the following streets and highways:

(1) All present and future arterials as defined by the New Haven Comprehensive Plan.

(2) Expressways, other limited access highways and their interchanges.

(3) Any other street or highway which the New Haven Plan Commission reasonably deems necessary or desirable in the development of real estate to achieve the purpose stated in paragraph (A).

(G) In designating areas for the location of access roads, the New Haven Plan Commission shall be guided by recommendations of the Urban Transportation Advisory Board, or its successor.

However, fences that do not create a visual or physical barrier (split-rail fence) and whose purpose cannot serve any physical function other than for decoration or aesthetic appeal, may be constructed up to 3-1/2 feet in height within the front and side yards of a front yard. Fences within planned unit development (RS-P) zoning districts may be exempted from the above requirements by the Plan Commission as part of development plan approval.

All swimming pool fences or walls shall be constructed as to have no openings larger than four inches in dimension, except for doors and gates. All doors and gates shall be self-latching and self-closing.

(C) No fence, wall, hedge, planting, or other obstruction to vision in excess of 2-1/2 feet shall be erected or maintained on that part of the corner lot that is included between the lines of intersection street rights-of-way and a line intersecting them at points of 25 feet distance from the intersection of the street lines.

The New Haven Board of Public Works must approve all permanent directional signs.

No part of any sign or sign structure including supports, shall be located within a clear vision area except directional signs which must be less than three (3) feet in height. A sign may project or extend into a clear vision area only if the sign’s lowest edge is greater than eight (8) feet above ground level or if the sign is less than three (3) feet in total height. Clear vision area is described as:

(a) An area formed by the intersection of the right-of-way lines of two public roadways and a line connecting points measured twenty-five (25) feet from the intersection of these right-of-way lines; and

(b) A strip five (5) feet wide adjacent and parallel to all proposed or existing public right-of-way lines, whichever is greater.

(3) No sign shall be erected or maintained so as to prevent the free ingress or egress from any door, window, or fire escape, and no signs shall be attached to a standpipe or fire escape.

(2) Computation of Area of Multiple-Faced Signs. The sign area for a sign with more than one (1) face shall be computed by adding together the area of all sign faces visible from any one (1) point. When two (2) identical sign faces are placed back to back, so that both faces cannot be viewed from any point at the same time, and when such sign faces are part of the same sign structure and are not more than forty-two (42) inches apart, the sign area shall be computed by the measurement of one (1) of the faces.

(D) Construction and Design Standards. All signs shall meet the construction and design standards set forth for signs in the Allen County Building Code.
(E) **Maintenance.** Painted faces or structural members shall be repainted whenever peeling or fading occurs. (B) Inspection. The Zoning Administrator may inspect, at such times as deemed necessary, each sign or sign structure regulated by this Section for the purpose of ascertaining whether the sign is in compliance with this Section or any other relevant City code, law or Ordinance.

(C) Unsafe and Unlawful Signs.

(1) Duty to Remove or Repair.

(a) Should the Zoning Administrator find any sign regulated by this Section to be unsafe, unlawful, or a menace to the public, or constructed, erected, or maintained in violation of the provisions of this Section, he or she shall cause notice to be given to the holder of the permit, or the property owner in the case of exempt signs, by one of the following methods:

1) Delivery by registered or certified mail to the holder of the permit or to the owner at the address last shown on the City records, of a written notice of violation of the Sign Ordinance; or

2) Posting in a visible place upon the real property a notice of violation of the City Sign Ordinance and sending, by first class mail, to the holder of the permit or to the owner at the address last shown on the City records, a written notice of violation of the City Sign Ordinance.

(b) If the holder of the permit should fail to remove the sign or bring the sign or other advertising structure in compliance, by initiation of appropriate action in the Allen Circuit or Superior Court, the Zoning Administrator may cause, at the holder’s or property owner’s expense, the sign or other advertising structure to be removed or brought into compliance.

(c) If the holder or owner fails to pay the Court ordered costs and expenses of such repair or removal, then such costs and expenses shall become a lien against the property. In addition, the Zoning Administrator shall refuse to issue a Sign Permit to any holder or owner who refuses to pay the costs and expenses assessed under this provision.

(2) Unlawful signs. Unlawful signs, regardless of type, shall be removed within
twenty-four (24) hours of the time when notice was perfected.

(3) Signs Causing Immediate Peril. The Zoning Administrator may cause any sign or other advertising structure that is in immediate peril to persons or property to be removed summarily without notice.

(D) Signs No Longer In Use.

(1) Removal. Any sign advertising a defunct business, or an unavailable product or service, shall be taken down and removed by the owner, agent, or person having the control of the premises upon which the sign is located.

(2) Notice. The Zoning Administrator shall give notice to the owner or to any person occupying the property that the sign on the premises is in violation.

(3) Failure to Comply. Failure to comply with the notice within the time specified shall cause the Zoning Administrator to authorize removal by initiation of appropriate action in the Allen Circuit or Superior Court. Expenses related to removal shall be the responsibility of the owner of the premises upon which such sign is located.

(4) Lien. The Zoning Administrator shall notify the owner or occupant of the premises of the total costs incurred for such repair or removal of the sign. If the owner or occupant fails to pay the Court ordered costs and expenses of such repair or removal, then such costs and expenses shall become a lien against the property.

(1) Authority to Continue. Any lawful sign located within the City at effective date of this Ordinance or which shall come to be located in the City as a result of annexation after effective date of this Ordinance, which does not conform to the provisions of this Section, may continue provided, the sign remains in conformance with the provisions of this Section.

(3) Ordinary Maintenance and Repair. Nothing in this Section shall relieve the owner or beneficial user of a legal nonconforming sign, or the owner of the property on which the legal nonconforming sign is located from the provisions of this Section regarding safety, maintenance, and repair. Normal maintenance, including repainting, cleaning, or routine repair of a legal nonconforming sign shall not be deemed to a condition which triggers a loss of lawful status described below, unless such maintenance increases, in fact, the nonconforming aspects of the sign.
(4) **Repairs Pursuant to Public Order.** Nothing in this Section shall be deemed to prevent the strengthening or restoration to a safe condition of a legal nonconforming sign in accordance with a reasonable order of a public official who is charged with protecting the public safety and who declares such a sign to be unsafe and order its restoration to a safe condition, provided such restoration is not otherwise in violation of the various provisions of this Section prohibiting the repair or restoration of partially damaged or destroyed signs.

(5) **Loss of Lawful Status.**

(a) Legal nonconforming status shall terminate under the following conditions:

[1] if the use of a sign is discontinued for a period of sixty (60) days, it shall be deemed abandoned and shall not thereafter be reestablished; or

[2] if a sign is structurally altered such that its nonconforming aspects increase; or

[3] if a sign is relocated, replaced, or moved in any way; or the sign is damaged and the cost of repair is fifty (50) percent of its replacement value.

(b) Upon the happening of any of the aforementioned events, the sign shall be immediately brought into compliance with this Section in conjunction with a new sign permit or the sign shall be removed. For the purposes of this Section, the changing of copy shall not be considered the replacement of an existing legal nonconforming sign.

§151.155 BOARD OF ZONING APPEALS

(A) Organization.

(1) A Board of Zoning Appeals for the City is established in accordance with IC 36-7-4-100 et seq.

(B) Powers of the Board.

(1) The Board of Zoning Appeals shall do the following:

(a) Hear and determine appeals from and review any order, requirement, decision, or determination made by the Zoning Administrator and any other administrative official or board charged with the enforcement of this Chapter or any regulation adopted pursuant hereto.

(b) Permit and authorize contingent uses and special exceptions subject to and within the limitations prescribed by the provisions of this Chapter.

(c) Authorize, on appeal in specific cases, such variance from the terms of this Chapter as will not be contrary to the public interest, where, owing to special conditions, a literal enforcement of the provisions of this Chapter will result in unnecessary hardship, and so that the spirit of this Chapter shall be observed and substantial justice done. However, no action shall be taken or decision made except after public hearing.

(2) In exercising its powers, the Board may reverse or affirm, wholly, or partly, or may modify the order, requirement, decision, or determination appealed from as in its opinion ought to be done in the premises, and to that end shall have all powers of the officer or board from whom the appeal is taken. It may impose such conditions, regarding the location, character, and other features of the proposed building, structure, or use with which the appeal before it is concerned, as it may deem advisable in the furtherance of the purposes of this Chapter and the protection of the public convenience and welfare.

(3) Variances from Flood Hazard District provisions.

(b) The Board shall issue a written notice to the recipient of an approved variance from the provisions of the Flood Hazard District that the proposed construction below the regulatory flood profile could result in increased premium rates for flood insurance and that such construction increases the risks to life and property.

(c) The Board shall not approve a variance of the provisions of the FW (Floodway District) prior to receipt of written approval for the request from the Indiana Natural Resources Commission.

(C) Procedure of the Board. The procedure of the Board shall be governed by the provisions of IC 36-7-4-100 et seq.

§151.156 IMPROVEMENT LOCATION PERMIT

(A) All buildings, structures, and satellite television antennas; or dwellings; except those buildings and structures incidental to agricultural uses; utility lines and supports; accessory buildings of 144 square feet or less; and fences which are no greater than eight feet in height and located behind the front building line or the side building line on the side street of a corner lot, shall not be erected, reconstructed, enlarged, maintained, or moved until an Improvement Location Permit shall have been issued by the Zoning Administrator.

(B) No Improvement Location Permit shall be issued by the Zoning Administrator for the maintenance or proposed erection, reconstruction, enlargement, or moving of a building or structure unless the same conforms with the provisions of this Chapter.

(C) Applicants for Improvement Location Permits shall be made by the owner of the real estate on which the improvement is to be, or has been, located, or the agent thereof, or the superintendent or contractor in charge of the work, on forms prescribed by the Zoning Administrator and shall be accompanied by plans and specifications of sufficient detail to enable the Zoning Administrator to determine whether the improvements, as erected or proposed, will comply with provisions of this Chapter.

(D) The applicant shall post the permit in a prominent place on the premises prior to and during the period of erection, reconstruction, enlargement, or moving.

(E) Every permit may be revoked if active work is not commenced within 60 days after the date of its issue, and continued with due diligence to completion. The Zoning Administrator shall judge if due diligence is being shown and shall notify the owner or agent in case due diligence is not being shown.

(F) If the Zoning Administrator determines that the person to whom a permit has been issued has failed to commence active work within 60 days of the issuance of the permit, or that
work commenced is not being continued with due diligence to completion, or is not proceeding according to the detailed statement, plans, and specifications on which the permit was issued, or is proceeding in violation of law, it shall be his duty to give written notice thereof to the owner or his agent, requiring the same to be rectified within ten days of the written notice if given or within such other reasonable time as may be determined by the Zoning Administrator.

(G) If the owner or his agent neglects to comply with the provisions of the notice within the specified time period, it shall be the further duty of the Zoning Administrator to revoke the permit; and written notice thereof shall be immediately given to the owner, agent, superintendent, or contractor in charge of the work, or posted on the property.

(H) After such revocation of permit, any person performing any work in or about the structure, building, or premises shall be subject to the penalties set forth in §151.999.

(I) (1) Notwithstanding any of the provisions of this Section requiring an application for, and issuance of, an Improvement Location Permit prior to the erection, reconstruction, enlargement, or moving of a building or structure, the owner of the real estate on which any such building or structure is maintained without an Improvement Location Permit having been obtained therefor, shall be in violation of this Chapter. On being advised of the existence of the building or structure, the Zoning Administrator shall immediately give the owner written notice of the violation. The owner shall be required to make application for an Improvement Location Permit, in accordance with (C) above, within ten days after the written notice is given.

(2) If the Zoning Administrator determines that the building or structure so erected or maintained fails to conform with the provisions of this Chapter, the owner shall be granted 30 days to complete, to the satisfaction of the Zoning Administrator, the modifications necessary to cause the building or structure to be in compliance with those provisions.

(J) If the owner fails to timely apply for an Improvement Location Permit as required hereinabove, or if at the end of the 30-day period the building or structure is not in conformity with the provisions of this Chapter, the owner of the real estate on which the building or structure is located shall be subject to the penalties set forth in §151.999.

(K) For purposes of this Chapter, if written notice is required to be given to any person, the requirement shall be considered satisfied as of the date of deposit of same in the United States mail, postage prepaid, addressed to the owner or agent thereof, at his last known address or principal place of business, or by delivery.

§151.157 CERTIFICATE OF OCCUPANCY

(A) No occupancy, use, or change of use, except buildings and structures incidental to
agricultural uses and public utility lines and supports, shall take place until a Certificate of Occupancy shall have been applied for and issued by the Zoning Administrator in the following cases:

(1) Occupancy and use of a building or structure hereinafter erected or enlarged.

(2) Change in use of an existing building or structure.

(3) Occupancy in the use of vacant land except for the raising of crops, poultry, or livestock.

(4) Change in the use of land to a use of a different classification except for the raising of crops, poultry, or livestock.

(5) Any change in use of a nonconforming use.

(B) If the proposed use is in conformity with the provisions of this Chapter, the Certificate of Occupancy therefor shall be issued within three days after the application for the same has been made. Provided, however, that no Certificate of Occupancy shall be issued in connection with the construction, alteration, enlargement, or moving of a building or structure until the construction, alteration, enlargement, or moving shall have been completed. Each Certificate of Occupancy shall state that the building or proposed use of a building or land complies with all the provisions of this Chapter.

(C) In the event a dwelling within a Commission-approved recorded plat is occupied prior to the issuance of a Certificate of Occupancy by the Zoning Administrator, and the Certificate of Occupancy could not be issued therefor because improvements serving the dwelling as shown on the approved subdivision plans had not been installed or are not operational, the Zoning Administrator shall not issue any additional Improvement Location Permits within the recorded plat until all subdivision improvements, as approved by the Commission, serving the occupied dwelling are properly installed and operational and the dwelling otherwise qualifies for the Certificate of Occupancy.

[Ord. 698, passed 7-11-62; Ord. G-38-80, passed 12-9-80]

(B) All departments, officials, and employees of the City which are vested with the duty of authority to issue permits or licenses shall conform to the provisions of this Chapter and shall issue no permit or license for any use, building, or purpose if the same would be in conflict with the provisions of this Chapter. Any permit or license issued in conflict with the provisions of this Chapter shall be null and void.
§151.159   MORE RESTRICTIVE STANDARDS APPLY

(A) Whenever the provisions of this Chapter are more restrictive or impose higher standards than are required by any statute of the State of Indiana or of any other ordinance of this county or by any restrictions or limitations as to particular property established by deed, plat, or otherwise running with the land, the provisions of this Chapter shall govern.

(B) Whenever the provisions of any statute or any other ordinance of this City or any restrictions or limitations established by plat or deed or otherwise running with the land, are more restrictive or impose higher standards than are required by this Chapter, the provisions of that statute, Chapter, ordinance, plat deed restrictions, or limitations shall govern. Provided, nothing herein shall be construed to prevent the Plan Commission or Board of Zoning Appeals from assuming jurisdiction of a subject matter of a parcel of real estate upon, or concerning, which the Plan Commission or Board of Zoning Appeals has authority to act under the provisions of this Chapter, including, but without in any way being limited to, the holding of public hearings and the rendering decisions thereon. Provided further, nothing contained herein shall be construed to obligate the Zoning Administrator of the City or any other official charged with the enforcement of this Chapter, to enforce the more restrictive statute, ordinance, restriction, or limitation.

[Ord. 698, passed 7-11-62; Ord. G-38-80, passed 12-9-80]

§151.160   FILING FEES

Applications and petitions filed pursuant to the provisions of this Chapter shall be accompanied by the filing fees then currently set and published by the Plan Commission.

§151.998   REMEDIES

(A) The erection, construction, enlargement, conversion, moving, or maintenance of any building or structure and the use of any land or building which is continued, operated, or maintained contrary to any provisions of this Chapter is hereby declared to be a nuisance and in violation of this Chapter and unlawful. The Zoning Administrator may issue an immediate stop work order or may institute a suit for injunction in the Circuit Court or any Superior Court of Allen County to restrain any person or governmental unit from violating any provision of this Chapter and to cause the issuance of a stop work order shall not be a condition precedent to the institution of an injunctive action. Injunctive action may also be instituted by any property owner who may be especially damaged by the violation of any provision of this Chapter.
(B) The remedies provided for in this Section shall be cumulative, and not exclusive, and shall be in addition to any other remedies provided by law.

[Ord. G-10-81, passed 6-9-81]

Each day of the existence of any violation of this Chapter shall be a separate offense.

(B) Any person deemed in violation of §151.038(A) shall be fined in an amount not to exceed $250. CHAPTER 152: ECONOMIC REVITALIZATION AREAS

Section

152.01 Procedure for Designation
152.02 Standards for Designation
152.03 Filing Fees
152.04 Limitations on Designation
152.05 Property Within an Allocation Area
152.06 County Plan Commission to Serve as Administrative Agency
§152.01 PROCEDURE FOR DESIGNATION

Procedure for designating an economic revitalization area pursuant to IC 6-1.1-12.1 is as follows:

(A) Whenever a property owner desires that certain real estate located within the corporate limits of the City be designated as an economic revitalization area, the owner(s) shall initiate the procedure by filing an application for designation in the office of the County Plan Commission. The application shall be signed by the owner(s) of record of the real estate for which the designation is being requested. The application shall be accompanied by the fee as established in §152.03, to be paid upon submission. The Plan Commission staff shall furnish an appropriate form for such application upon request.

(B) The petitioner(s) shall note on the application whether the request is being made for a designation:

(1) Limited to a deduction of assessed value on real property improvements; or

(2) Limited to a deduction of assessed value on new manufacturing equipment as defined in IC 6-1.1-12.1-1; or

(3) To include both types of deductions allowed under IC 6-1.1-12.1.

(C) Upon receipt of an application for designation, the Plan Commission staff shall:

(1) Note the date of filing on the face of the application.

(2) Review the application, and, if it is found to be in complete form and to have been signed by all property owners of record within the area proposed for designation, the matter shall be submitted for consideration before the City Common Council, with no publication of notice being necessary, within 60 days of the date of acceptable submission.

(3) Provide the Council with appropriate maps and plats necessary to identify the area for which the petition requests designation, along with a simplified description of its boundaries.

(D) The Council shall not consider an application for designation of real estate as an economic revitalization area if, prior to the filing of the application with the Plan Commission, any of the following actions have occurred:

(1) An Improvement Location Permit for the subject development for which a deduction is being sought has been issued by the City Zoning Administrator.
(2) A structural permit for the subject rehabilitation for which a deduction is being sought has been issued by the County Building Department.

(3) Manufacturing equipment for which a deduction is being sought has been installed.

(E) The applicant(s) or its representative shall be present at the Council meeting at which the subject request is being considered. After review of information provided in the application by the Plan Commission staff, and by the applicant and other interested persons, the Council may:

(1) Find that the real estate under consideration meets the definition and standards of an economic revitalization area, as set forth in IC 6-1.1-12.1-1(1) and §152.02. In such instances, the Council may adopt a declaratory resolution stating same, and cause the action set forth in paragraph (F) of this Section to occur. This declaratory resolution shall include the reasons upon which the determination is made.

(2) Find that there is insufficient information, and defer action on the matter. The applicant shall be provided written notice of the reasons for deferral within 10 days of that action.

(3) Determine that the real estate should not be designated as an economic revitalization area, and provide the applicant with written notice thereof.

(F) Upon adoption of a declaratory resolution, the Council shall:

(1) Set the date, time, and location for a public hearing at which the Council will receive and hear all comments from interested persons.

(2) Cause notice of the adoption and substance of the declaratory resolution to be published in accordance with IC 6-1.1-12.1-2.5 and IC 5-3-1. The notice shall state that a description of the affected area is available and can be inspected in the offices of the City Clerk, the County Plan Commission, the County Assessor, and the County Auditor. The notice shall also state the time, date, and location of the subsequent public hearing on the matter.

(3) Cause a generalized description of the subject real estate to be attached to the declaratory resolution, and file same with the City Clerk, the County Assessor, and the County Auditor.

(G) Upon considering the evidence presented at the public hearing, the Council shall take final action on the request for designation by either confirming, modifying and confirming, or rescinding the subject declaratory resolution. The applicant(s) or its representative shall be present at the public hearing to provide such information as may be needed.
(H) The determination on the confirmatory resolution made pursuant to paragraph (G) of this Section shall be final, except that an appeal may be taken as provided in IC 6-1.1-12.1-2.5(d) and IC 6-1.1-12.1-2.5(e).

(I) Upon confirming, or modifying and confirming, a declaratory resolution by the procedures set forth in this Section, the City Clerk, the County Auditor, and the County Plan Commission shall keep a permanent record of the designation of the subject economic revitalization area. The Plan Commission staff shall also provide the Auditor with a final designation packet to be utilized in the review of applications for deduction pursuant to IC 6-1.1-12.5 and IC 6-1.1-12.5-5.

[Ord. G-85-28, passed 12-10-85]

§152.02 STANDARDS FOR DESIGNATION

(A) In its deliberations on designating an economic revitalization area, the City Common Council may, pursuant to IC 6-1.1-12.1-2(e), give consideration to the following general standards, to determine if:

(1) The designation will encourage the use of vacant or under-utilized land designated as appropriate for industrial development in the City comprehensive plan, or which is currently zoned for industrial use.

(2) The designation will encourage the improvement of a deteriorated structure or the replacement of an obsolete structure.

(3) The designation will encourage the preservation of an historically or architecturally significant structure.

(4) The designation will assist in the inducement of a project providing substantial employment opportunities relative to the value of the improvements to be made or the new manufacturing equipment to be installed.

(5) The designation will assist in the inducement of a project which would provide long-term benefits to the tax base of the City warranting the granting of the annually decreasing percentage of tax abatement as provided in IC 6-1.1-12.1.

(B) In all instances, the Council shall find that evidence has been provided either in the application or during the public hearing that the real estate proposed for designation is in an area which has become undesirable for, or impossible for normal development and occupancy because of a lack of development, cessation of growth, deterioration of improvements or character of occupancy, age, obsolescence, substandard buildings, or other factors which have impaired values or prevent a normal development of property or use of property.

[Ord. G-85-28, passed 12-10-85]
§152.03   FILING FEES

   In order to defray the costs incurred in processing applications for designation of economic revitalization areas, and pursuant to IC 6-1.1-12.1-2(f), the following rules shall apply:

   (A) In a case where the subject real estate is an owner-occupied single-family residential project, the applicant shall pay the cost of publication of the required legal notice, as provided in IC 6-1.1-12.1-2.5.

   (B) In cases where the subject real estate is utilized for purposes other than as specified in paragraph (A) of this Section, the applicant shall pay a filing fee as set forth in the following schedule:

<table>
<thead>
<tr>
<th>Value of Proposed Improvements for which a Deduction is Being Sought</th>

</tr>
</thead>
<tbody>
<tr>

<td>$150</td>
</tr>
<tr>
<td>$1,000,000 and over</td>
<td>$250</td>
</tr>
</tbody>
</table>

   The filing fee shall be included along with the application at the time of filing with the Plan Commission, and shall be made payable to the County Treasurer. The applicant shall also pay the cost of publication of the required legal notice as provided in IC 6-1.1-12.1-2.5.

[Ord. G-85-28, passed 12-10-85]

§1521.04   LIMITATIONS ON DESIGNATION

   As part of its authority to designate economic revitalization areas, the Common Council, pursuant to IC 6-1.1-12.1-2(g), may qualify a designation by:

   (A) Limiting the time period of the designation to a certain number of calendar years during which the area shall be so designated.

   (B) Limiting the type of deductions that will be allowed within an economic revitalization area to either the deduction allowed under IC 6-1.1-12.1-3 or the deduction allowed under IC 6-1.1-12.1-4.5.

[Ord. G-85-28, passed 12-10-85]
§152.05 PROPERTY WITHIN AN ALLOCATION AREA

Notwithstanding the procedures set forth in §152.01, the City Common Council shall not designate real estate as an economic revitalization area if any portion of the subject property is located within an allocation area as defined in IC 36-7-14-39, unless the County Redevelopment Commission has first adopted a resolution consenting to the subject designation.

[Ord. G-85-28, passed 12-10-85]

154.02 Definitions
154.03 Permitted Uses in the Floodplain
154.04 Administration
154.05 Standard of Protection
154.06 Damage Prevention and Flood Protection

154.08 Variances
154.09 Disclaimer of Liability
154.10 Violations

Flood losses are caused by:

(A) The cumulative effect of practices and obstructions in the floodplain which causes increased flood heights and velocities; and

(B) The occupancy of flood hazard areas by uses vulnerable to flood damages, or by uses which create hazards to surrounding lands as a result of flood discharges caused by more intensive use of upland drainage areas in the form of residential developments, streets, parking lots, commercial building, storm drain construction and other uses and practices which promote increased storm water runoff.

§154.02 DEFINITIONS

For the purpose of this Chapter only, the following definitions are adopted:

Base Flood Elevation. The elevation of the regulatory flood.

Building. See "structure".

Cumulative Effect. The impact on the environment which results from the incremental impact of an action when added to other past and present actions. A cumulative effect can result from individually minor, but collectively significant, actions taking place over a period of time.

Development. Any change or improvement to land brought about by human activity including but not limited to:

(1) Construction, reconstruction, or placement of a building or any addition to a building;

(2) Installation of a manufactured home on a site, preparing a site for a manufactured home, or installing a recreational vehicle on a site for more than 180 days, where permitted;

"Development" does not include any authorized activity with respect to a regulated drain as defined in IC 36-9-27-2, as may be amended from time to time. Neither does this definition include activities such as maintenance of existing structures and facilities such as painting, reroofing, resurfacing roads, or gardening, plowing, and similar agricultural practices that do not involve filling, grading, excavating, or constructing permanent structures.

Existing Manufactured Home Park or Subdivision. A manufactured home park or subdivision for which the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including, at a minimum the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is completed before the effective date of this ordinance.

Expansion to an Existing Manufactured Home Park or Subdivision. The preparation of additional sites by the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads).

**Floodway.** The channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water-surface elevation more than one-tenth (.10) of a foot.

**Floodway Fringe.** That area outside of the floodway within the area of the regulatory flood that is inundated from flood flows of varying depths.

**Historic Structure.** Any structure that is:

1. Listed individually on the National Register of Historic Places (a listing maintained by the Department of Interior) or preliminarily determined by the United States Secretary of the Interior as meeting the requirements for individual listing on the National Register;

4. The top of the first floor of a building elevated on pilings or constructed on a crawl space with permanent openings; or
5. The top of the floor level of any enclosure below an elevated building where the walls of the enclosure provide any resistance to the flow of flood waters unless:
   a. The walls are designed to automatically equalize the hydrostatic flood forces on the walls by allowing for the entry and exit of flood waters by providing a minimum of two openings (in addition to doorways and windows) having a total area of (1) square inch for every one (1) square foot of enclosed area subject to flooding. The bottom of all such openings shall be no higher than one (1) foot above grade.

Manufactured Home. A structure, transportable in one or more sections, which is built on a permanent chassis and is designed for use with or without a permanent foundation when attached to the required utilities. The term "manufactured home" does not include a "recreational vehicle."

Manufactured Home Park or Subdivision, Existing. A manufactured home park or subdivision for which the construction of facilities for servicing the lots on which the manufactured homes are to be affixed (including, at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is completed before the effective date of this Chapter.

Manufactured Home Park or Subdivision, Expansion. The preparation of additional sites by the construction of facilities for servicing the lots on which the manufactured homes are
to be affixed (including the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads).

Manufactured Home Park or Subdivision, New. A new manufactured home park or subdivision for which construction of facilities for servicing lots on which manufactured homes are to be affixed (including at a minimum, installation of utilities, construction of streets, and either final site grading or pouring of concrete pads) is completed on or after the effective date of these floodplain management regulations.

Market Value. The most probable price for which the appraised property (in this case just the structure in question) will sell in a competitive market under all conditions necessary to a fair sale, with the buyer and seller each acting prudently, knowledgeably, and for self-interest and assuming that neither is under duress.

New Construction. For the purpose of determining insurance rates, structures for which the "start of construction" commenced on or after the effective date of the initial Flood Insurance Rate Maps including any subsequent improvements to such structure. For floodplain management purposes, "new construction" means structure for which the "start of construction" commenced on or after the effective date of these floodplain management regulations, including any subsequent improvements to such structures.

Recreational Vehicle. A vehicle which is built on a single chassis designed to be self-propelled or permanently towable by a light duty truck, and not designed primarily for use as a permanent dwelling, but as temporary living quarters for recreational camping, travel, or seasonal use.

Regulatory Flood. A flood having a one percent probability of being equaled or exceeded in any given year, as calculated by a method and procedure approved by the Indiana Natural Resources Commission. A regulatory flood is also known by the terms "base flood" and "100-year flood".

Significant. Any action which would increase the height of a regulatory flood by a measurable amount.

Special Flood Hazard Area (SFHA). Those lands within the New Haven Plan Commission jurisdictional area that are subject to inundation by the regulatory flood. The SFHAs of the City are generally identified as such on the Flood Insurance Rate Map as amended from time to time.

Start of Construction. The date a building permit was issued, provided the actual start of construction, repair, reconstruction, rehabilitation, addition placement, or other improvement was within 60 days of the permit date. The actual start means either the first placement of permanent construction of a structure on a site, such as the pouring of slab or footings, the installation of pilings, the construction of columns, or any work beyond excavation or filling; or placement of a manufactured home on a foundation. For a substantial improvement, the actual
start of construction means the first alteration of any wall, ceiling, floor, or other actual part of a building, whether or not that alteration affects the external dimensions of the building.

**Structure.** Anything constructed or erected with a fixed location on the ground, or attached to something having a fixed location on the ground, of 144 square feet or more. For the purposes of this Chapter, the term includes a gas or liquid storage tank, a manufactured home, or a prefabricated building. The term also includes recreational vehicles and travel trailers to be installed on a site for more than 180 days where allowable by this Chapter.

**Substantial Damage.** Damage of any origin sustained by a structure whereby the costs of restoring the structure to its before-damaged condition would equal or exceed 50 percent of the market value of the structure before the damage occurred.

**Substantial Improvement.** Any reconstruction, rehabilitation, addition, or other improvement of a structure, the cost of which equals or exceeds 50 percent of the market value or, the before-damaged market value, if substantially damaged, before the start of construction of the improvement. This term includes structures which have incurred substantial damage, regardless of the actual repair work performed. The term does not, however, include:

1. Any project for improvement of a structure to correct existing violations of State or local health, sanitary, or safety code specifications which have been identified by the local code enforcement official and which are the minimum necessary to assure safe living conditions; or

2. Any alteration of a historic structure, provided that the alteration will not preclude the structure's continued designation as an historic structure.

**Watershed.** An area which drains to a single point. In a natural basin, this is the area contributing flow to a given place or stream.

**Zone A.** Shaded areas on the Flood Insurance Rate Map where base flood elevations have not been determined.

**Zone AE.** Shaded areas on the Flood Insurance Rate Map where base flood elevations have been determined.

**Zone AH.** Shaded areas on the Flood Insurance Rate Map depicting flood depths of one to three feet (usually areas of ponding) and where base flood elevations have been determined.

**Zone AO.** Shaded areas on the Flood Insurance Rate Map depicting flood depths of one to three feet (usually sheet flow on sloping terrain) where average depths have been determined. For areas of alluvial fan flooding, velocities have also been determined.

**Zoning Administrator.** The person appointed by the New Haven Plan Commission to enforce and administer the provisions of this Zoning Code.
Zoning District. Portions of the territory within the jurisdiction of the New Haven Plan Commission shown on the zoning maps for New Haven to which a uniform set of regulations apply. These regulations may prohibit and permit certain land uses per district, while also prescribing certain yard, height, and other dimensional requirements.

§154.03 PERMITTED USES IN THE FLOODPLAIN

A. Floodway. The purpose of this Section is to guide development away from areas identified as floodway. The floodway, as identified, is not to be considered a zoning district. The floodway is identified as such by Federal Emergency Management Agency on the most current edition of the Allen County and Incorporated Areas Flood Insurance Study, dated November 5, 2003, and Flood Insurance Rate Maps. These maps, and any subsequent revisions thereto, are adopted by reference and declared to be part of this Section:

1. Permitted Uses. The following uses shall be permitted by right (exclusive of enclosed structures) if permitted by the zoning district in which the property is located:

   a. Agricultural uses.

   b. Wildlife areas, nature preserves, forests, and wetlands.

   c. Parks and recreational uses, such as golf courses, driving ranges, and play areas, provided no structures or fill will be located within the floodway.

   d. Public utilities.

   e. Public transportation facilities such as roads, streets and bridges, which are located on public rights-of-way.

   f. Public works projects for flood control improvements such as levees, flood walls, and dams.

2. Prohibited Uses. All encroachments, including structures and fill, except the fill needed for public transportation facilities and public works projects for flood control improvements.

B. Floodway Fringe. The purpose of this Section is to control and minimize development in areas subject to potential flooding, but outside an identified floodway. The floodway fringe, as identified, is not to be considered a zoning district. The floodway fringe is that area identified by the Federal Emergency Management Agency on the most current edition of the Allen County and Incorporated Areas Flood Insurance Study and Flood Insurance Rate Maps as outside the floodway, but subject to inundation by the regulatory flood. These maps
and any subsequent revisions thereto are adopted by reference and declared to be part of this Section.

(1) **Permitted Uses.**

(a) All uses permitted in the floodway.

(b) All structures permitted within the applicable zoning district, meeting all damage protection and building protection standards of this Chapter.

(c) Accessory uses permitted within the applicable zoning district, meeting all damage prevention and building protection standards of this Chapter.

(2) **Prohibited Uses.** Fill placed for any reason other than for public and transportation facilities, utilities, flood control improvements, or approved structures as permitted in §154.03(B)(1).

(C) **Non-conforming Uses.** Any building, structure, or use that does not conform to this Chapter as of the date of adoption is a non-conforming use. Any new construction, provided that it is not in a floodway, must conform to the flood proofing provisions and lowest floor elevations required by this Chapter.

[Ord. Z-95-15, passed 11-14-95; Ord. X-03-22, passed 11-25-03]

§154.04 **ADMINISTRATION**

(A) **Duties of the Zoning Administrator.** The Zoning Administrator shall implement this Code and shall review all development and subdivision proposals to insure compliance with this Code, including but not limited to the following duties:

(1) Obtain the "as built" elevation (in relation to mean sea level) of the lowest floor of all new or substantially improved structures in the floodplain, including allowed fill and required excavation.

(2) Obtain, for all structures that have been flood-proofed (whether or not such structures include a basement), the elevation (in relation to mean sea level) to which the structure was flood-proofed.

(3) Maintain a record of all such information.

(4) Ensure that all new development proposals requiring review under the terms of this Chapter are reviewed by persons with the necessary technical expertise to correctly apply the requirements of this Chapter.
(5) Require any reports or technical data that are necessary to ensure compliance.

(6) Place conditions on any Improvement Location Permit to ensure compliance with the intent, purpose, and regulations of this Chapter, or any similar regulation set forth by a State or federal agency.

(7) Maintain for public inspection and furnish upon request regulatory flood data, SFHA maps, Letters of Map Amendment (LOMA), Letters of Map Revision (LOMR), copies of DNR permits and letters of recommendation, federal permit documents, and "as built" elevation and flood proofing data for all buildings constructed subject to this Chapter.

(8) Notify any affected adjacent communities and the State coordinating office prior to any City initiated substantial alteration or relocation of a watercourse which lies within an SFHA, and submit copies of such notifications to FEMA.

(B) Improvement Location Permit. No construction or development which requires an Improvement Location Permit according to the terms of this Chapter shall commence within a floodplain without first obtaining an Improvement Location Permit. The Zoning Administrator shall not issue an Improvement Location Permit if the proposed use, structure, or development does not meet the requirements of this Chapter.

(1) The application for an Improvement Location Permit shall be accompanied by the following:

   (a) A description of the proposed development.

   (b) Location of the proposed development sufficient to accurately locate property and structure in relation to existing roads and streams.

   (c) A legal description of the property site.

   (d) A site development plan showing existing and proposed development locations and existing and proposed land grades.

   (e) Elevation of the top of the lowest floor (including basement) of all proposed development. Elevation should be in National Geodetic Vertical Datum of 1929 (NGVD) or North American Vertical Datum (NAVD). In either case the conversion formula should be included.

(2) Upon receipt of an application for an Improvement Location Permit, the Zoning Administrator shall determine if the site is located within an identified floodway, floodway fringe, or within the floodplain where the limits of the floodway have not yet been determined.
(a) If the site is within an identified floodway, the Zoning Administrator shall require the applicant to forward the application, along with all pertinent plans and specifications, to the Department of Natural Resources and apply for a permit for construction in a floodway. Any use in the floodway allowed by this Chapter, but not requiring an Improvement Location Permit, must comply with the provision of IC 14-38-1.

(b) Under the provisions of IC 14-28-1, a permit from the Natural Resources Commission is required prior to the issuance of a local building permit for any excavation, deposit, construction or obstruction activity located in the floodway. This includes land preparation activities such as filling, grading, clearing and paving, etc., undertaken before the actual start of construction of the building.

(c) No action shall be taken by the Zoning Administrator until a permit has been issued by the Natural Resources Commission granting approval for construction in the floodway. Once a permit has been issued by the Natural Resources Commission, the Building Official may issue the local Improvement Location Permit, provided the provisions contained in §154.06 of this Chapter have been met. The Improvement Location Permit cannot be any less restrictive than the permit issued by the Natural Resources Commission.

(3) If the site is located in an identified floodway fringe, the Zoning Administrator may issue an Improvement Location Permit provided there is compliance with §154.06 of this Chapter and provided that the top of the lowest floor of any new or substantially improved structure must be at or above the Flood Protection Grade (FPG).

(a) If the site is in an identified floodplain where the limit of the floodway and floodway fringe have not been determined (shown as Zone A on the Flood Insurance Rate Map) or are not otherwise clear, and the drainage area upstream of the site is greater than one square mile, the Zoning Administrator shall require the applicant to forward plans and specifications to the Indiana Department of Natural Resources, requesting a letter of recommendation.

(b) No action shall be taken by the Zoning Administrator until either a permit for construction in the floodway or a letter of recommendation citing the 100 year flood elevation and the recommended Flood Protection Grade has been received from the Department of Natural Resources.

(c) Once the Zoning Administrator has received the proper permit or letter of recommendation approving the proposed development, an Improvement Location Permit may be issued provided the conditions of the Improvement Location Permit are not less restrictive than the conditions received from the Department of Natural Resources and the provisions contained in §154.06 of this Chapter have been met.
(d) If the site falls within an area designated as Zone A on the Flood Insurance Rate Map and the upstream drainage area is less than one square mile, an engineering study of the site shall be completed by the applicant and submitted to the Zoning Administrator. A determination shall then be made by the Zoning Administrator, with the advice from the Allen County Surveyor's office, as to whether the site is in the floodway or floodway fringe. A permit may not be issued by the Zoning Administrator if the site is determined to be within the floodway. If the site is within the floodway fringe, the Improvement Location Permit may be issued in accordance with §154.06 of this Chapter.

(4) In addition to complying with the requirements of this Chapter, an application for an Improvement Location Permit proposing construction or improvements within a floodway fringe shall further include all the following:

(a) A plan showing the location of existing and proposed structures, and existing and proposed land grades, on the site;

(b) The elevation (in relation to mean sea level) of the lowest floor (including basement) of all proposed structures;

(c) A plan showing the location of existing and proposed structures in relation to any stream, drain, ditch or waterway; and

(d) Any additional information which may be necessary to determine the disposition of a proposed development or structure with respect to the requirements of this Chapter.

(C) Certificate of Occupancy. No Certificate of Occupancy shall be issued by the Zoning Administrator unless it has been confirmed the structure has been built in compliance with the terms of this Chapter. The Zoning Administrator may require the applicant to submit any information which may be needed to ensure compliance.

§154.05 STANDARD OF PROTECTION

(A) Regulatory Flood Elevation. This Chapter's protection standard is the regulatory flood. The best available regulatory flood data is listed below. Whenever a party disagrees with the best available date, the party submitting a detailed engineering study needs to replace existing data with better data and submit it to the Indiana Department of Natural Resources for review and approval.

(1) The regulatory flood elevation and floodway limits for the SFHAs of all water courses shall be as delineated on the 100 year floor profiles in the Flood Insurance
Study of Allen County, Indiana and incorporated areas and the latest corresponding FBFM/FIRM prepared by the Federal Emergency Management Agency.

(2) The regulatory flood elevation for each floodplain delineated as an "AH Zone" or "AO Zone" shall be in elevation (or depth) delineated on the Flood Insurance Rate Map for Allen County and Incorporated Areas.

(3) The regulatory flood elevation for each floodplain delineated as an "A Zone" on the Flood Insurance Rate Map for Allen County and Incorporated Areas shall be determined according to the best data available as provided by the Department of Natural Resources.

(4) If the floodplain is delineated as "AH Zone" or "AO Zone", the elevation (or depth) will be delineated as "Zone A" on the Allen County and Incorporated Areas Flood Insurance Rate Map. If the floodplain is delineated as "Zone A" on the Flood Insurance Rate Map, the regulatory flood elevation shall be according to the best data available as provided by the Indiana Department of Natural Resources.

§154.06 DAMAGE PREVENTION AND FLOOD PROTECTION

(A) Preventing Increased Damages. No development shall be allowed in the floodplain which has a significant and irreversible effect, nor shall it create a damaging or potentially damaging increase in flood heights or velocity, or threat to public health and safety.

(1) Within the floodway identified on the Flood Boundary and Floodway Map, the Flood Insurance Rate Map, or engineering analysis as provided in §154.05(A)(4), the following standards shall apply:

   (a) No development shall be allowed which, acting alone or in combination with existing or future similar works, will cause any increase in the elevation of the regulatory flood; and

   (b) For all projects involving channel modifications or fill (including levees), the applicant shall submit a request to the Federal Emergency Management Agency to revise the regulatory flood data.

(2) Within the floodway fringe identified in the Flood Insurance Rate Map, the following standards shall apply:

   (a) Structures shall be constructed as far from the floodway as possible, assuring all applicable building setback and separation requirements are maintained, unless it is demonstrated that an alternative location would have less of an impact on the floodplain due to a decreased need for fill and/or excavation;
(b) The total cumulative effect of the proposed development, when combined with all other existing development, shall not increase the regulatory flood elevation nor increase real or potential flood damages;

(c) Fill material taken from within the floodplain shall offset the fill needed for an approved building project so the water storage capacity of the floodplain is not diminished; excavation of the fill shall take place in the floodplain fill retrieval zone; and excavated area within the floodplain shall provide for true storage of floodwater but shall not be subject to ponding when not inundated by floodwater; the fill shall not obstruct a drainage way leading to the floodplain;

(d) Fill material taken from outside of, but adjacent to, the floodplain shall be excavated so the finished elevation of the excavation site is below the elevation of the regulatory flood; the capacity of an area excavated in such a manner shall offset the fill needed for an approved building project so the water storage capacity of the floodplain is not diminished; excavation of the fill shall take place in the same immediate watershed in which the building site is located; the fill shall not obstruct a drainage way leading to the floodplain; the excavated area shall not be refilled;

(e) Fill shall be of a material deemed stable enough to remain firm and in place during periods of flooding; runoff and drainage protection shall be provided to adjacent property owners; and

(f) Plans depicting the areas to be excavated and filled according to (c) and/or (d) above shall be submitted by the applicant prior to the actual start of construction; once site work is complete, but prior to the actual start of construction, the applicant shall provide to the Zoning Administrator a certified survey of the excavation and fill sites demonstrating the fill and excavation comply with this Chapter.

(3) Within the floodplain as identified on the Flood Insurance Rate Maps, the following public health standards shall apply to protect the community from nuisances and hazards:

(a) No development in the floodplain shall include locating or storing chemicals, explosives, buoyant materials, flammable liquids, pollutants, or other hazardous or toxic materials below the flood protection grade, unless such materials are stored in a storage tank or flood-proofed building constructed according to the requirements of §154.06(C)(5); and

(b) New and replacement sanitary sewer lines and on-site waste disposal systems may be permitted providing all manholes or other above ground openings located below the flood protection grade are watertight.
Within all SFHAs identified as A Zones (no 100 year flood elevation and/or floodway fringe delineation has been provided), the following standard shall apply:

(a) The total cumulative effect of the proposed development, when combined with all other development, will not increase the regulatory flood elevation and will not increase flood damages or potential flood damages.

(B) Structures Affected by Building Protection Standards. In addition to damage prevention requirements of §154.06, all buildings to be located in the floodplain shall be protected from flood damage below the flood protection grade. These building protection standards apply to the following situations:

(1) Construction or placement of any new structure;

(2) Structural alterations made to an existing building;

(3) Reconstruction or repairs made to a building that experienced substantial damage. Any structure receiving substantial damage immediately becomes subject to substantial improvement and must comply with all applicable requirements of this Chapter;

(4) Installing a manufactured home on a new site or a new manufactured home on an existing site. This does not apply to returning the existing manufactured home to the same site it lawfully occupied before it was removed to avoid flood damage; and,

(5) Installing a recreational vehicle on a site for more than 180 days, where allowed by this Chapter.

(C) Building Protection Methods. Building protection may be accomplished by one of the following methods. The Zoning Administrator shall maintain a record of compliance with these building protection standards as required in §154.04(A).

(1) A structure may be constructed on a site within the floodway fringe which is specifically and permanently filled for the structure only, provided the fill was not placed in a floodway, in accordance with the following:

   (a) The fill shall be placed in layers no greater than one foot deep before compacting to 95 percent of the maximum density obtainable with the Standard Proctor Test method;

   (b) The fill shall extend at least ten feet beyond the foundation of the building before sloping below the flood protection grade;

   (c) The fill shall be protected against erosion and scour during flooding by vegetative cover, riprap, bulkheading, or other acceptable method. If
vegetative cover is used, the slopes shall be no steeper than 3 to 1 (horizontal to vertical);

(d) The fill shall not adversely affect the flow of surface drainage from or onto neighboring properties or receiving waterways; and

(e) The lowest floor shall be at or above the flood protection grade.

(2) A structure may be elevated in accordance with the following:

(a) The building or improvements shall be elevated on posts, piers, columns, extended walls or other types of similar foundation provided:

(i) Walls of any enclosure below the elevated door shall be designed to automatically equalize hydrostatic flood forces on the walls by allowing for the entry and exit of floodwaters by providing a minimum of two openings (in addition to doorways and windows) having a total area of one square foot for every two square feet of enclosed floor area subject to flooding. The bottom of all such openings shall be no higher than one foot above grade; and

(ii) Any enclosure below the elevated floor is not used for additional occupied floor space by the permitted use, excluding building access.

(b) The foundation and supporting members shall be anchored and aligned in relation to flood flows and adjoining structure so as to minimize exposure to known natural forces such as current, waves, ice, and floating debris.

(c) All areas below the flood protection grade shall be constructed of materials resistant to flood damage. The lowest floor and all electrical, heating, ventilating, plumbing, and air conditioning equipment and utility meters shall be located at or above the flood protection grade. Water and sewer pipes, electrical and telephone lines, submersible pumps, and other waterproofed service facilities may be located below the flood protection grade.

(3) Manufactured homes and recreational vehicles to be installed or substantially improved on a site for more than 180 days must meet one of the following anchoring requirements:

(a) The manufactured home shall be elevated on a permanent foundation such that the top of the lowest floor shall be at or above the flood protection grade and securely attached to an adequately anchored foundation system to resist flotation, collapse, and lateral movement. This requirement applies to all manufactured homes to be placed on a site;
(i) Outside a manufactured home park or subdivision;

(ii) In a new manufactured home park or subdivision;

(iii) In an expansion to an existing manufactured home park or subdivision; or

(iv) In an existing manufactured home park or subdivision on which a manufactured home has incurred substantial damage as a result of a flood.

(b) The manufactured home shall be elevated so that the lowest floor of the home's chassis is supported by reinforced piers or other foundation elements, as specified in §154.06(C)(2), that are no less than 36 inches in height above grade and be securely attached to an adequately anchored foundation system to resist flotation, collapse, and lateral movement. This requirement applies to all manufactured homes to be placed on a site in an existing manufactured home park or subdivision that has not been substantially damaged by a flood.

(4) Recreational vehicles placed on a site shall either:

(a) Be on the site for less than 180 consecutive days;

(b) Be fully licensed and ready for highway use (defined as being on its wheels or jacking system, is attached to the site only by quick disconnect type utilities and security devices, and has no permanently attached additions); or

(c) Meet the requirements for manufactured homes in §154.06(C)(3).

(5) A nonresidential building may be flood-proofed to the flood protection grade (in lieu of elevation) if done in accordance with the following:

(a) A registered professional engineer shall certify that the portions of the structure and attendant utility facilities located below the flood protection grade have been designed to be watertight and capable of resisting the effect of the regulatory flood. The building design shall take into account flood velocities, duration, rate of rise, hydrostatic pressures, and impact from debris or ice.

(b) Flood proofing measures shall be operable without human intervention and without an outside source of electricity.

[Ord. Z-95-15, passed 11-14-95; Ord. X-03-22, passed 11-25-03]

§154.07 SUBDIVISION AND DEVELOPMENT PLAN REQUIREMENTS
(A) Developing in Floodplain Areas. The Plan Commission shall review all proposed subdivision and development plans to determine whether any or all of the proposed development lies in a floodplain. If the Plan Commission finds the subdivision or development plan, or portion thereof, to be located in an "A Zone" without regulatory flood elevations determined, the developer shall forward plans and materials to the Indiana Department of Natural Resources for review and comment. If the site is shown to contain areas within floodway, those portions within the floodway will be subject to the permitted use requirements of this Chapter. The Plan Commission shall require appropriate changes and modifications to be made to the plat, development plan, and subsequent development, in order to assure that:

1. No structure or fill is to be located in the floodway;
2. Development activities are consistent with the need to reduce flood damages;
3. Adequate drainage is provided so as to reduce exposure to flood hazards;
4. All public utilities and facilities, such as sewer, gas, electrical, and water systems are located and constructed to minimize or eliminate flood damage;
5. On-site waste disposal systems, if provided, will be so located and designed as to avoid impairment of them or contamination from them during the occurrence of the regulatory flood.

(B) Flood Elevations. Developers shall show the regulatory flood elevation on all development plans and subdivision plats prior to submitting the drawings for approval by the Plan Commission.

(C) Manufactured Housing Developments. All owners of manufactured home parks or subdivision located within a floodplain identified as "Zone A" on the Flood Insurance Rate Map must develop an evacuation plan for those lots which are located in "Zone A." The plan must be approved by, and filed with, the Allen County Office of Emergency Preparedness. A copy of the plan shall also be filed with the Plan Commission.

[Ord. Z-95-15, passed 11-14-95; Ord. X-03-22, passed 11-25-03]

§154.08 VARIANCES

(A) Board of Zoning Appeals. The Board of Zoning Appeals may issue a variance from the technical provision of this Chapter (as opposed to the permitted use provisions) provided the applicant demonstrates that:

1. There exists a good and sufficient cause for the requested variance; and
2. The strict application of the terms of this Chapter will constitute an exceptional hardship to the applicant; and
(3) The granting of the requested variance will not create additional threats to public safety, cause additional public expense, create nuisances, cause fraud or victimization of the public, or conflict with existing laws or ordinances.

(B) **Grant of Variance.** The Board of Zoning Appeals may issue a variance from the technical provisions of this Chapter subject to the following standards and conditions:

1. All variance requests are subject to a public hearing upon complying with the notification requirements of IC 5-3-1.

2. A variance shall not be granted for a use of a structure in the floodway unless otherwise permitted.

3. Prior to the granting of a variance from any part of this Chapter the applicant shall obtain a letter of comment from the Maumee River Basin Commission and submit that letter to the Zoning Administrator.

4. A variance may be granted for the reconstruction or restoration of any structure listed individually on the National Register of Historic Places or the Indiana State Survey of Historic Architectural, Archaeological and Cultural Sites, Structures, Districts, and Objects.

5. All variances shall give the minimum relief necessary and be such that the maximum practical flood protection will be given to the proposed construction.

6. Other than as provided in this Section, variances will only be granted in accordance with provisions as set out in the New Haven Zoning Code. In the event of a conflict, the provisions of this Section will control.

7. The Board of Zoning Appeals shall issue a written notice to the recipient of a variance or exception that the proposed construction will be subject to increased risks to life and property and could require payment of increased flood insurance premiums.

[Ord. Z-95-15, passed 11-14-95; Ord. X-03-22, passed 11-25-03]

§154.09 **DISCLAIMER OF LIABILITY**

**Disclaimer of Liability.** The degree of flood protection required by this Chapter is considered reasonable for regulatory purposes and is based on available information derived from engineering and scientific methods of study. Larger floods can and will occur on rare occasions. Therefore, this Chapter does not create any liability on the part of the community, the Indiana Department of Natural Resources, the State of Indiana, the Allen County Surveyor's Office, the New Haven Plan Commission and Board of Zoning Appeals, the New Haven Zoning
Administrator, or the New Haven Common Council for any flood damage that results from reliance on this Chapter or any administrative decision made lawfully thereunder.

[Ord. Z-95-15, passed 11-14-95; Ord. X-03-22, passed 11-25-03]

§154.10 VIOLATIONS

Failure to obtain and Improvement Location Permit in the SFHA or failure to comply with the requirements of a permit or conditions of a variance shall be deemed to be a violation of this Chapter. Any violation shall be considered a common nuisance and be treated as such in accordance with the provisions of the Zoning Code for the City of New Haven. Any violation shall be punishable by a fine not exceeding $500.00.

(A) A separate offense shall be deemed to have occurred for each day the violation continued to exist.

(B) The New Haven Plan Commission shall inform the owner that any such violation is considered a willful act to increase flood damages and, therefore, may cause coverage by a Standard Flood Insurance Policy to be suspended or denied.

(C) Nothing herein shall prevent the City of New Haven from taking such other lawful action to prevent or remedy any violations. All costs connected therewith shall accrue to the person or persons responsible.

[Ord. Z-95-15, passed 11-14-95; Ord. X-03-22, passed 11-25-03]

§154.11 VALIDITY AND EFFECTIVE DATE

(A) Validity. If any section, clause or portion of this Chapter is judged to be invalid or unconstitutional, such judgment shall not affect the validity or constitutionality of the Chapter or Code as a whole, or any other part thereof.

(B) Effective Date. This Chapter shall be in full force and effect upon final passage by the New Haven Common Council and execution by the Mayor.

§154.12 ABROGATION AND GREATER RESTRICTIONS

This Ordinance repeals and replaces other ordinances adopted by the City Council to fulfill the requirements of the National Flood Insurance Program. However, this Ordinance
does not repeal the original resolution or ordinance adopted to achieve eligibility in the Program, nor does this Ordinance repeal, abrogate, or impair any existing easements, covenants, or deed restrictions. Where this Ordinance and other ordinances, easements, covenants, or deed restrictions conflict or overlap, whichever imposes the more stringent restrictions shall take precedence.
