New Haven Night at the Tincaps

Summertime and warm weather bring people out to enjoy community events. We would like to remind everyone to watch out for pedestrians, children, bicycles, and motorcycles. Also, please make sure you watch out for road crews as we continue with road projects. Enjoy your summer and be safe.

One of our upcoming community events includes a “Night at the Tincaps”. Join us for an evening of fun on Thursday, August 3, 2017 at Parkview Field. For more information about tickets, please contact the New Haven Chamber of Commerce at 749-4484.

New Haven Night At the TinCaps
Join us as we celebrate!
Tickets Just $7 each

CELEBRATE NEW HAVEN
REPRESENTATIVES FROM THE CITY WILL BE
ON HAND TO THROW OUT THE FIRST PITCH

THIRSTY THURSDAY
GREAT DRINK SPECIALS, INCLUDING $1
DOMESTIC DRAFTS AND $2 MIXED DRINKS

POSTGAME FIREWORKS SHOW
AFTER THE GAME, WE WILL SHOOT OFF
FIREWORKS STRAIGHT FROM CENTERFIELD!

RUN THE BASES
AFTER THE GAME, ALL FANS ARE WELCOME ON THE FIELD!
The 2017 season of the New Haven Farmers Market will be held on Wednesday afternoons from 4:00-7:00 p.m. in Schnelker Park beginning June 21st and running through September 20th. The Farmers Market will offer fresh local produce, locally homemade prepared foods, and locally home-crafted goods to the families of our community. We invite you to bring your family downtown to shop local with our vendors and be a part of this experience. Plan to stay a while and listen to live music, play with the kids, eat dinner beneath the shade of trees and create memories to last a lifetime.

For more information, contact the Park Office at (260) 749-2212 or visit our website at www.newhavenparksandrec.org.

**NEW HAVEN SUBSCRIPTION EMS**

The New Haven Subscription EMS program is offered only once a year and the deadline is rapidly approaching. If you would like an application, you can download a copy by visiting our website at www.newhavenin.org or by contacting the New Haven EMS at 749-1235.

Complete the application, sign the form and mail it with your check or money order today. Visa and MasterCard are also acceptable methods of payment. Your application and $55.00 payment must be received by June 30, 2017 when the membership drive ends.

Be sure to carefully review your coverage and membership contract. For any questions about coverage or how to complete the application, please contact the New Haven EMS at 749-1235.

**Deadline is June 30, 2017**

**Fireworks Reminders**

As we prepare to celebrate Independence Day, the City of New Haven would like to remind residents that Indiana state law (I.C. §22-11-14-10.5) regulates the usage of consumer fireworks within the State of Indiana to specific dates and times listed below.

Additionally, §93.52 of the New Haven Municipal Code states that: (A) No person within the City of New Haven may use, ignite or discharge or permit to be used, ignited or discharged any type of consumer fireworks on any other day or time other than the following:

- **June 29** (between the hours of 5:00 p.m. to two hours after sunset)
- **July 1**
- **July 2**
- **July 3**
- **July 4th** (between the hours of 10:00 a.m. and 12:00 midnight)
- **July 5**, **July 6**, **July 7**, **July 8**, **July 9**

**Holidays for usage of consumer fireworks include:** Memorial Day, July 4, Labor Day and New Year’s Eve.

For a copy of the Indiana Code regarding fireworks, please visit www.in.gov. For a copy of the Ordinance for New Haven, visit our website at www.newhavenin.org.

Commitment to Clean, Safe Water
The City of New Haven Utilities Dept is pleased to present the City’s Annual Water Quality Report. This report will help inform you what steps are taken to provide you with safe and dependable water from your faucet. Please carefully read this CCR report and if you have any questions, feel free to call the phone numbers listed in this report.

Another Important Year for Water Quality
New Haven’s water compares with the best. It meets or exceeds all water quality standards set by national, state, and local agencies. This CCR Report is required of all public and private water suppliers nationwide on an annual basis.

New Haven’s Water Source
New Haven’s water is purchased and tested from Ft. Wayne. Ft. Wayne’s source of water comes from the St. Joseph River. A series of dams and pumps bring the water to Ft. Wayne for treatment and then it is pumped to New Haven for distribution to your home.

How Drinking Water is Monitored
New Haven and Ft. Wayne utilities routinely monitor for contaminants in your drinking water according to Federal and State laws. The tables included illustrate the results for the period from January 1st to December 31st 2016. All drinking water, including bottled water, may be expected to contain small amounts of contaminants.

It is important to remember that the presence of these contaminants does not pose a health risk. For more information on potential health risks, call the EPA Safe Drinking Water Hotline at 1-800-426-4791.

Important Customer Information Sources
If you have any questions or concerns regarding the water New Haven distributes to you, please contact our office Monday through Thursday 7AM - 4PM or Friday 7AM - 3:30PM at (260) 748-7050. We ask all of our customers to help us protect our water sources which are the heart of our community, our way of life, and our children’s future.

Dave Jones Superintendent of Utilities
djones@newhavenin.org
www.epa.gov/safewater

Do I Need to Take Special Precautions
Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised people such as those with cancer, people who have undergone organ transplants, people with HIV/AIDS, and some elderly people and infants can be particularly at risk for infections. These people should seek advice about drinking water from their health care providers.

When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline at either 1-800-426-4791 or by visiting the website at http://www.epa.gov/safewater/lead.

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER MONITORING REQUIREMENTS NOT MET FOR NEW HAVEN WATER DEPARTMENT
Our water system recently violated a drinking water standard. Although this is not an emergency, as our customers, you have a right to know what happened, what you should do, and what we are doing to correct this situations. We are required to monitor your drinking water for specific contaminants on a regular basis. The results of regular monitoring are an indicator of whether or not our drinking water meets EPA’s Health standards. The last monitoring period testing for Total Trihalomethanes and Haloacetic Acids was either not performed or failed to comply with all the requirements of the Stage 2 Disinfectants and Disinfection Byproducts Rule (Stage 2 DBPR); therefore, we cannot be sure of the quality of the water at that time.

What should I do?
You do not need to use an alternative (i.e., bottled) water supply. However, if you have specific health concerns, consult your doctor.

What does this mean?
This is no an immediate risk. If it had been, you would have been notified immediately. Some people who drink trihalomethanes in excess of the maximum Contaminant Level (MCL) over many years may experience problems with their liver, kidneys, or central nervous system, and may have increased risk of getting cancer. Some people who drink water containing haloacetic acids in excess of the MCL over many years may have increased risk of getting cancer.

What happened? What is being done?
New Haven Water Department had 1 sample from 7/01/2016-9/30/2016 that was missed. This problem was corrected as soon as the department was notified. Checks have been put into place so it will not happen again. For more information, please contact Dave Jones at 260-748-7056 or djones@newhavenin.org or PO Box 570, New Haven, IN 46774.

Water Quality Data Table
The table lists all of the drinking water contaminants that we detected during the calendar year of this report. The presence of contaminants in the water does not necessarily indicate that the water poses a health risk. Unless otherwise noted, the data presented in this table is from testing done in the calendar year of the report. The EPA or the State required us to monitor for certain contaminants less than once per year because the concentrations of these contaminants do not change frequently.

How to Read the Water Quality Table
- **Maximum Contaminant Level Goal (MCLG):** The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.
- **Maximum Contaminant Level (MCL):** The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.
- **Maximum Residual Disinfectant Level Goal (MRDLG):** The level of a residual disinfectant in drinking water below which there is no known or expected risk to health. MRDLGs allow for a margin of safety.
- **Maximum Residual Disinfectant Level (MRDL):** The highest level of a residual disinfectant that is allowed in drinking water. MRDLs are set as close to the MRDLGs as feasible using the best available treatment technology.
- **Treatment Technique (TT):** A required process intended to reduce the level of a contaminant in drinking water.
- **Action Level (AL):** The concentration of a contaminant, which, if exceeded, triggers treatment or other requirements that a water system must follow.
- **Range:** The lowest to highest values for all samples tested for each contaminant. If only one sample is tested, no range is listed.
- **NA:** Not applicable.
- **ppm:** Parts per million or milligrams per liter (mg/L).
- **ppb:** Parts per billion or micrograms per liter (µg/L).
- **NTU:** Nephelometric Turbidity Units (a measure of the water’s cloudiness).
